

# Invesco Asia Pacific Growth Fund

## Emerging markets

Data as of June 30, 2010

### Investment objective and strategy

The fund seeks long-term growth of capital by investing in reasonably priced, quality companies in the Asia Pacific region, excluding Japan, with strong fundamentals and/or accelerating earnings growth.

### Portfolio management

Barrett K. Sides, Steve Cao, Mark Jason

### How does the fund fit into your portfolio?

- **All-cap Asia Pacific exposure.** The fund offers investors the ability to tap into high-quality growth opportunities in the Asia Pacific region (excluding Japan), across the market-cap spectrum.
- **Satellite strategy.** The fund can be paired with other regionally focused non-U.S. equity funds to create a broadly diversified international equity allocation, or for investors who want greater exposure to the Asia Pacific region, the fund can be added as a satellite in a core-plus-satellite asset allocation strategy that already has broad international exposure.
- **Diversification across region and style.** The fund's lower correlation to U.S. equities should provide attractive diversification benefits. Its investment process, which is focused on EQV (earnings, quality and valuation), may also serve as a complement to core- or value-biased domestic or international portfolios.

### Investment Results

Period	Average Annual Total Returns (%)					as of June 30, 2010	
	Class A Shares Inception: 11/03/97		Class C Shares Inception: 11/03/97		Class Y Shares Inception: 10/03/08	Style-Specific Index	
	Max Load 5.50%	NAV	Max CDSC 1.00%	NAV	NAV	MSCI AC Asia Pacific Ex-Japan Index

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invesco.com](http://invesco.com) for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or a loss when you sell shares. No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C shares following one year from the date shares were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Class Y shares have no sales charge; therefore, performance is at NAV. Performance shown prior to the inception date of Class Y shares is that of Class A shares and includes the 12b-1 fees applicable to Class A shares. Class A share performance reflects any applicable fee waivers or expense reimbursements. Had fees not been waived and/or expenses reimbursed currently or in the past, returns would have been lower. A 2% redemption fee will be imposed on certain redemptions or exchanges out of the fund within 31 days of purchase. Exceptions to the redemption fee are listed in the fund's prospectus. Returns less than one year are cumulative; all other performance figures are annualized.

### Calendar-Year Total Returns (%)

### About risk

Securities issued by foreign companies and governments located in developing countries may be affected more negatively by inflation, devaluation of their currencies, higher transaction costs, delays in settlement, adverse political developments, the introduction of capital controls, withholding taxes, nationalization of private assets, expropriation, social unrest, war or lack of timely information than those in developed countries.

The fund's foreign investments may be affected by changes in the foreign country's exchange rates; political and social instability; changes in economic or taxation policies; difficulties when enforcing obligations; decreased liquidity; and increased volatility. Foreign companies may be subject to less regulation resulting in less publicly available information about the companies.

Because the fund's investments are concentrated in the Pacific region, the fund's performance is expected to be closely tied to social, political, and economic conditions within the Pacific region and to be more volatile than the performance of more geographically diversified funds.

## About risk (continued)

Growth stocks tend to be more expensive relative to their earnings or assets compared with other types of stock. As a result they tend to be more sensitive to changes in their earnings and can be more volatile.

The investment techniques and risk analysis used by the fund's portfolio managers may not produce the desired results.

The prices of securities held by the fund may decline in response to market risks.

Class Y shares are available only to certain investors. See the prospectus for more information.

The fund holdings are organized according to the Global Industry Classification Standard, which was developed by and is the exclusive property and service mark of MSCI Inc. and Standard & Poor's.

Neither MSCI nor any other party involved in or related to compiling, computing or creating the MSCI data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in or related to compiling, computing or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Asset allocation/diversification does not guarantee a profit or eliminate the risk of loss.

The MSCI AC Asia Pacific Ex-Japan Index is an unmanaged index considered representative of Pacific region stock markets, excluding Japan. An investment cannot be made directly in an index.

**12-month forward and trailing P/E** are calculated using weighted harmonic averaging, which helps avoid extreme results that may occur due to small relative numbers in the denominator. It doesn't exclude extreme values; instead, it reduces the effect of outliers on the aggregate calculation. The **price/book ratio** is the market price of a stock divided by the book value per share. **Return on equity (ROE)** is net income divided by net worth. The **three-year EPS growth rate** is a weighted average of each stock holding's growth rate in earnings per share (EPS). EPS is total earnings divided by the number of shares outstanding. This measurement is not a forecast of the fund's performance. The **five-year dividend growth rate** is the weighted average of each stock holding's annualized percentage rate of growth in dividend yield over five years. This measurement is not a forecast of the fund's performance. **Alpha** (cash adjusted) is a measure of performance on a risk-adjusted basis. **Beta** (cash adjusted) is a measure of relative risk and the slope of regression. **R-squared** (cash adjusted) expresses the proportion of variation in the return of one fund explained by the return of a benchmark. **Tracking error** measures the difference between returns of a portfolio and its benchmark index. The **up and down capture** measures how well a manager was able to replicate or improve on periods of positive benchmark returns and how severely the manager was affected by periods of negative benchmark returns. **Standard deviation** measures a fund's range of total returns and identifies the spread of a fund's short-term fluctuations.

It may not be copied or distributed and is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Ratings are based on a risk-adjusted return measure that accounts for variation in a fund's monthly performance, placing more emphasis on the downward variations and rewarding consistent performance. With-load ratings include the effect of sales charges, loads and redemption fees. Load-waived ratings exclude sales charges, loads and redemption fees, and are only applicable to investors not subject to sales charges. Had fees not been waived and/or expenses reimbursed in the past, the Morningstar rating would have been lower. The overall rating is derived from a weighted average of three-, five- and 10-year rating metrics, as applicable. Ratings are as of the most recent quarter end and are subject to change every month. A fund is eligible for a Morningstar rating three years after inception. The top 10% of funds in a category receive five stars, the next 22.5% four stars, the next 35% three stars, the next 22.5% two stars and the bottom 10% one star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) Ratings for other share classes may differ due to different performance characteristics. Past performance does not guarantee future results.

\*\*Source: Morningstar Inc. Morningstar rankings are based on total return, excluding sales charges and including fees and expenses, versus all funds in the category tracked by Morningstar.

\*\*\*Source: Lipper Inc. Lipper fund percentile rankings are based on total returns, excluding sales charges and including fees and expenses, and are versus all funds in the category tracked by Lipper.
