

# AIM Constellation Fund

## Large-cap growth

Data as of Sept. 30, 2009

### Investment objective and strategy

The fund seeks capital growth by investing in large-, mid- and small-cap companies that management believes can generate sustainable growth in revenue, earnings and cash flow that is not fully reflected in current stock prices or equity valuations.

### Portfolio management

Robert J. Lloyd, Ryan A. Amerman

### How does the fund fit into your portfolio?

- **Large-cap exposure.** While the fund has the flexibility to invest across market cap ranges, its large-cap bias provides exposure to companies that typically have diversified business models, globally diversified revenues and lower costs of capital.
- **Rebalancing tool.** After several years of outperformance by other asset classes and investment styles, investors are likely structurally underweight large caps and the growth style. Rebalancing into this fund may help reduce portfolio risk.

### Investment Results

Average Annual Total Returns (%)							as of Sept. 30, 2009

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invescoaim.com](http://invescoaim.com) for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or a loss when you sell shares. No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C shares following one year from the date shares were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Class Y shares have no sales charge; therefore, performance is at NAV. Returns since the Class Y shares' inception date are actual returns. All other returns are blended returns of actual Class Y share performance and restated Class A share performance (for periods prior to the inception date of Class Y shares) at NAV and reflect the Rule 12b-1 fees as well as any fee waivers or expense reimbursements applicable to Class A shares. Returns less than one year are cumulative; all other performance figures are annualized.

### Calendar-Year Total Returns (%)

### About risk

Prices of equity securities change in response to many factors, including the historical and prospective earnings of the issuer, the value of its assets, general economic conditions, interest rates, investor perceptions and market liquidity.

Foreign securities have additional risks, including exchange rate changes, political and economic upheaval, relative lack of information, relatively low market liquidity, and the potential lack of strict financial and accounting controls and standards.

Leveraging entails risks such as magnifying changes in the value of the portfolio's securities.

Investing in a fund that invests in smaller companies involves risks not associated with investing in more established companies, such as business risk, stock price fluctuations and illiquidity.

Because a large percentage of the fund's assets may be invested in securities of a limited number of companies, each investment has a greater effect on the fund's overall performance and any change in the value of those securities could significantly affect the value of an investment in the fund.

### Fund Facts

Nasdaq	A: CSTGX B: CSTBX C: CSTCX Y: CSTYX R: CSTRX I: CSITX
Total Net Assets	\$3,156,692,381
Total Number of Holdings	126
Annual Turnover (as of 10/31/08)	96%

### Investment Map(s)

The map illustrates areas in which the fund typically invests, not necessarily within a limited period of time.

### Top Equity Holdings

Company	% of Total Net Assets
Baxter International Inc.	3.07
Google Inc.	2.28
Research In Motion Ltd.	2.21
KDDI Corp.	2.09
United Technologies Corp.	2.06
MasterCard Inc.	2.04
Apple Inc.	2.03
Abbott Laboratories	2.00
Gilead Sciences Inc.	2.00
Qualcomm Inc.	1.98

Holdings are subject to change and are not buy/sell recommendations.

### Top Industries

Industry	% of Total Net Assets
Aerospace & Defense	7.36
Communications Equipment	5.71
Health Care Equipment	5.39
Computer Hardware	5.14
Semiconductors	4.81
Pharmaceuticals	3.48
Data Processing & Outsourced Services	3.15
Biotechnology	3.07
Systems Software	2.81
Internet Software & Services	2.58

Holdings are subject to change and are not buy/sell recommendations.

### Expense Ratios

Class	% Net	% Total
Class A Shares	1.26	1.28
Class C Shares	2.01	2.03
Class Y Shares	1.01	1.03

Per the current prospectus

Net = Total annual operating expenses less contractual advisory fee waivers by the adviser in effect through at least Dec. 31, 2012. See current prospectus for more information.

Class Y shares are available only to certain investors. See the prospectus for more information.

The fund holdings are organized according to the Global Industry Classification Standard, which was developed by and is the exclusive property and service mark of MSCI Inc. and Standard & Poor's.

The Russell 1000® Growth Index is an unmanaged index considered representative of large-cap growth stocks. The Russell 1000 Growth Index is a trademark/service mark of the Frank Russell Co. Russell® is a trademark of the Frank Russell Co. An investment cannot be made directly in an index.

**12-month forward and trailing P/E** are calculated using weighted harmonic averaging, which helps avoid extreme results that may occur due to small relative numbers in the denominator. It doesn't exclude extreme values; instead, it reduces the effect of outliers on the aggregate calculation. The **price/book ratio** is the market price of a stock divided by the book value per share.

**Return on equity (ROE)** is net income divided by net worth. The **three-year EPS growth rate** is a weighted average of each stock holding's growth rate in earnings per share (EPS). EPS is total earnings divided by the number of shares outstanding. The **five-year dividend growth rate** is the weighted average of each stock holding's annualized percentage rate of growth in dividend yield over five years. **Alpha** (cash adjusted) is a measure of performance on a risk-adjusted basis. **Beta** (cash adjusted) is a measure of relative risk and the slope of regression. **R-squared** (cash adjusted) expresses the proportion of variation in the return of one fund explained by the return of a benchmark. **Tracking error** measures the difference between returns of a portfolio and its benchmark index. The **up and down capture** measures how well a manager was able to replicate or improve on periods of positive benchmark returns and how severely the manager was affected by periods of negative benchmark returns. **Standard deviation** measures a fund's range of total returns and identifies the spread of a fund's short-term fluctuations.

It may not be copied or distributed and is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Ratings are based on a risk-adjusted return measure that accounts for variation in a fund's monthly performance, placing more emphasis on the downward variations and rewarding consistent performance. With-load ratings include the effect of sales charges, loads and redemption fees. Load-waived ratings exclude sales charges, loads and redemption fees, and are only applicable to investors not subject to sales charges. The overall rating is derived from a weighted average of three-, five- and 10-year rating metrics, as applicable. Ratings are as of the most recent quarter end and are subject to change every month. A fund is eligible for a Morningstar rating three years after inception. The top 10% of funds in a category receive five stars, the next 22.5% four stars, the next 35% three stars, the next 22.5% two stars and the bottom 10% one star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) Ratings for other share classes may differ due to different performance characteristics. Past performance does not guarantee future results.

\*\*Source: Morningstar Inc. Morningstar rankings are based on total return, excluding sales charges and including fees and expenses, versus all funds in the category tracked by Morningstar.

\*\*\*Source: Lipper Inc. Lipper fund percentile rankings are based on total returns, excluding sales charges and including fees and expenses, and are versus all funds in the category tracked by Lipper.
