

AIM Dynamics Fund

Mid-cap growth

Data as of Dec. 31, 2009

Investment objective and strategy

The fund seeks long-term capital growth by investing primarily in common stocks of mid-cap companies that management believes can generate sustainable growth in revenue, earnings and cash flow that is not fully reflected in investor expectations or equity valuations.

Portfolio management

Paul J. Rasplicka, Brent Lium

How does the fund fit into your portfolio?

- **Mid-cap mainstay.** Mid-cap stocks fit a sweet spot for market size, generally providing more safety than smaller companies and potentially higher returns than large cap stocks.
- **Style-pure solution.** While many peers invest heavily in large- and small-cap stocks, the fund is a style-pure, mid-cap growth product.
- **Complement to core and value investments.** The fund's traditional growth approach may complement the core and value investment styles, helping to maximize total return and mitigate volatility.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invescoaim.com for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or a loss when you sell shares. No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C shares following one year from the date shares were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. The Investor Class shares have no sales charge; therefore, performance is at NAV. Class Y shares have no sales charge; therefore, performance is at NAV. Returns since the Class Y shares' inception date are actual returns. All other returns are blended returns of actual Class Y share performance and restated Investor Class share performance (for periods prior to the inception date of Class Y shares) at NAV and reflect the Rule 12b-1 fees as well as any fee waivers or expense reimbursements applicable to Investor Class shares. Had fees not been waived or expenses reimbursed on Class C shares in the past, returns would have been lower. Returns less than one year are cumulative; all other performance figures are annualized.

Calendar-Year Total Returns (%)

Inception year is 2002.

About risk

Portfolio turnover is greater than most funds, which may affect the fund's performance due to higher brokerage commissions. Active trading may also increase short-term gains and losses, which may result in taxable gain distributions to the fund's shareholders.

Prices of equity securities change in response to many factors, including the historical and prospective earnings of the issuer, the value of its assets, general economic conditions, interest rates, investor perceptions and market liquidity.

The fund invests in "growth" stocks, which may be more volatile than other investment styles because growth stocks are more sensitive to investor perceptions of an issuing company's growth potential.

About risk (continued)

There is no guarantee that the investment techniques and risk analysis used by the fund's portfolio managers will produce the desired results.

The prices of securities held by the fund may decline in response to market risks.

Stocks fall into three broad market capitalization categories - large, medium and small. Investing primarily in one category carries the risk that, due to current market conditions, the category may be out of favor with investors. Small and mid-sized companies may tend to be more vulnerable to adverse developments and more volatile than larger companies. Investments in small and mid-sized companies may involve special risks, including those associated with dependence on a management group; little or no operating history; little or no track record of success; and limited product lines, market and financial resources. Also, there may be less publicly available information about the issuers of the securities or less market interest in such securities than in the case of larger companies, which can each cause significant price volatility. The securities of small and mid-sized companies may be illiquid, restricted as to resale or trade less frequently and in smaller volume than more widely held securities, which may make it difficult for an underlying fund to establish or close out a position in these securities at prevailing market prices.

Investor Class shares are closed to new investors.

Investors should contact their financial adviser about other share classes.

Class Y shares are available only to certain investors. See the prospectus for more information.

The fund holdings are organized according to the Global Industry Classification Standard, which was developed by and is the exclusive property and service mark of MSCI Inc. and Standard & Poor's.

The Russell Midcap® Growth Index is an unmanaged index considered representative of mid-cap growth stocks. The Russell Midcap Growth Index is a trademark/service mark of the Frank Russell Co. Russell® is a trademark of the Frank Russell Co. An investment cannot be made directly in an index.

12-month forward and trailing P/E are calculated using weighted harmonic averaging, which helps avoid extreme results that may occur due to small relative numbers in the denominator. It doesn't exclude extreme values; instead, it reduces the effect of outliers on the aggregate calculation. The **price/book ratio** is the market price of a stock divided by the book value per share.

Return on equity (ROE) is net income divided by net worth. The **three-year EPS growth rate** is a weighted average of each stock holding's growth rate in earnings per share (EPS). EPS is total earnings divided by the number of shares outstanding. The **five-year dividend growth rate** is the weighted average of each stock holding's annualized percentage rate of growth in dividend yield over five years. **Alpha** (cash adjusted) is a measure of performance on a risk-adjusted basis. **Beta** (cash adjusted) is a measure of relative risk and the slope of regression. **R-squared** (cash adjusted) expresses the proportion of variation in the return of one fund explained by the return of a benchmark. **Tracking error** measures the difference between returns of a portfolio and its benchmark index. The **up and down capture** measures how well a manager was able to replicate or improve on periods of positive benchmark returns and how severely the manager was affected by periods of negative benchmark returns. **Standard deviation** measures a fund's range of total returns and identifies the spread of a fund's short-term fluctuations.

It may not be copied or distributed and is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Ratings are based on a risk-adjusted return measure that accounts for variation in a fund's monthly performance, placing more emphasis on the downward variations and rewarding consistent performance. With-load ratings include the effect of sales charges, loads and redemption fees. Load-waived ratings exclude sales charges, loads and redemption fees, and are only applicable to investors not subject to sales charges. The overall rating is derived from a weighted average of three-, five- and 10-year rating metrics, as applicable. Ratings are as of the most recent quarter end and are subject to change every month. A fund is eligible for a Morningstar rating three years after inception. The top 10% of funds in a category receive five stars, the next 22.5% four stars, the next 35% three stars, the next 22.5% two stars and the bottom 10% one star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) Ratings for other share classes may differ due to different performance characteristics. Past performance does not guarantee future results.
