Per the current prospectus

Investment objective and strategy

The fund seeks total return by investing primarily in the stocks of larger capitalization foreign companies with a record of stable earnings or dividends and a reputation for high-quality management.

Portfolio management

W. Lindsay Davidson, Michele T. Garren, Erik Granade, Kent Starke, Ingrid Baker, Ben Clark, Frank Crown, Sargent McGowan, Michelle Middleton, Matthew Miller, Jeffrey Silverman, Anuja Singa, Stephen Thomas

How does the fund fit into your portfolio?

- **Core international holding.** The fund offers a solution for investors seeking a conservatively managed large-cap international fund.
- **Complement to more aggressive investments.** The fund's focus on well-established, high-quality international companies makes it a solid complement to more aggressive portfolios.
- **Diversification.** The fund may enhance overall portfolio diversification due to its international exposure.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invescoaim.com for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or a loss when you sell shares. No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C shares following one year from the date shares were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. The Investor Class shares have no sales charge; therefore, performance is at NAV. Class Y shares have no sales charge; therefore, performance is at NAV. Returns since the Class Y shares' inception date are actual returns. All other returns are blended returns of actual Class Y share performance and restated Investor Class share performance (for periods prior to the inception date of Class Y shares) at NAV and reflect the Rule 12b-1 fees as well as any fee waivers or expense reimbursements applicable to Investor Class shares. Had fees not been waived or expenses reimbursed on Class C shares in the past, returns would have been lower. A 2% redemption fee will be imposed on certain redemptions or exchanges out of the fund within 31 days of purchase. Exceptions to the redemption fee are listed in the fund's prospectus. Returns less than one year are cumulative; all other performance figures are annualized.

Calendar-Year Total Returns (%)

Inception year is 2002.

About risk

Investing in developing countries can add additional risk, such as high rates of inflation or sharply devalued currencies against the U.S. dollar. Transaction costs are often higher, and there may be delays in settlement procedures.

Prices of equity securities change in response to many factors, including the historical and prospective earnings of the issuer, the value of its assets, general economic conditions, interest rates, investor perceptions and market liquidity.

Foreign securities have additional risks, including exchange rate changes, political and economic upheaval, relative lack of information, relatively low market liquidity, and the potential lack of strict financial and accounting controls and standards.

The prices of securities held by the fund may decline in response to market risks.
