

AIM Income Allocation Fund

Prospectus ▪ May 1, 2009

Invesco Aim Privacy Policy

We are always aware that when you invest in a fund advised by Invesco Aim, you entrust us with more than your money.

You also share personal and financial information with us that is necessary for your transactions and your account records. We take very seriously the obligation to keep that information confidential and private.

Invesco Aim collects nonpublic personal information about you from account applications or other forms you complete and from your transactions with us or our affiliates. We do not disclose information about you or our former customers to service providers or other third parties except to the extent necessary to service your account and in other limited circumstances as permitted by law. For example, we use this information to facilitate the delivery of transaction confirmations, financial reports, prospectuses and tax forms.

Even within Invesco Aim, only people involved in the servicing of your accounts and compliance monitoring have access to your information.

To ensure the highest level of confidentiality and security, Invesco Aim maintains physical, electronic and procedural safeguards that meet or exceed federal standards. Special measures, such as data encryption and authentication, apply to your communications with us on our website—<http://www.invescoaim.com>. More detail is available to you at that site.

Go Paperless with eDelivery

Visit invescoaim.com/edelivery to receive quarterly statements, tax forms, fund reports and prospectuses with a service that's all about ees:

- **environmentally friendly.** Go green with e-delivery by reducing the number of trees used to produce paper.
- **economical.** Help reduce your fund's printing and delivery expenses and put more capital back in your fund's returns.
- **efficient.** Stop waiting for regular mail. Your documents will be sent via email as soon as they're available.
- **easy.** Download, save and print files using your home computer with a few clicks of your mouse.

AIM Global Core Equity Fund		
AIM Global Equity Fund		

As of September 19, 2009, the United States Treasury Temporary Guarantee Program (the "Program") expired and any references to such Program are hereby removed.

The following replaces the last sentence in the first paragraph appearing under the heading "REDEEMING SHARES" in the prospectus:

"For Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio, the transfer agent must receive your call before the funds' net asset value determination in order to effect the redemption that day."

The following replaces in its entirety the second paragraph appearing under the heading "PRICING OF SHARES – Determination of Net Asset Value – *Open-end Funds.*" in the prospectus:

"Each fund, except for Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio, determines the net asset value of its shares on each day the NYSE is open for business (a business day), as of the close of the customary trading session, or earlier NYSE closing time that day. Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio open for business at 8:00 a.m. Eastern Time. Premier Portfolio and Premier U.S. Government Money Portfolio will generally determine the net asset value of their shares at 5:30 p.m. Eastern Time. Premier Tax-Exempt Portfolio will generally determine the net asset value of its shares at 4:30 p.m. Eastern Time. Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio are authorized not to open for trading on a day that is otherwise a business day if the Federal Reserve Bank of New York and The Bank of New York Mellon, the fund's custodian, are not open for business or the Securities Industry and Financial Markets Association (SIFMA) recommends that government securities dealers not open for trading and any such day will not be considered a business day. Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio also may close early on a business day if SIFMA recommends that government securities dealers close early. If Premier Portfolio, Premier Tax-Exempt Portfolio or Premier U.S. Government Money Portfolio uses its discretion to close early on a business day, the fund will calculate its net asset value as of the time of such closing."

The following replaces in its entirety the second paragraph appearing under the heading "**PRICING OF SHARES –Timing of Orders**" in the prospectus:

"For Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio, you can purchase or redeem shares on each business day, prior to the fund's net asset value determination on such business day; however, if your order is received and accepted after the close of the customary trading session or any earlier NYSE closing time that day, your order generally will be processed on the next business day and settled on the second business day following the receipt and acceptance of your order."

AIM Income Allocation Fund

PROSPECTUS

May 1, 2009

AIM Income Allocation Fund's investment objective is to achieve a high level of current income with growth of capital as a secondary objective.

This prospectus contains important information about the Class A, B, C, R and Y shares of the fund. Please read it before investing and keep it for future reference.

As with all other mutual fund securities, the Securities and Exchange Commission has not approved or disapproved these securities or determined whether the information in this prospectus is adequate or accurate. Anyone who tells you otherwise is committing a crime.

An investment in the fund:

- is not FDIC insured;
- may lose value; and
- is not guaranteed by a bank.

Risk/Return Summary

The fund's investment objective is to achieve a high level of current income with growth of capital as a secondary objective.

The fund is a "fund of funds," and invests its assets in other underlying mutual funds advised by Invesco Aim Advisors, Inc. (the advisor or Invesco Aim). The fund seeks to meet its objective by investing its assets in a selection of underlying funds which primarily invest in international or domestic equities, fixed income securities or real estate investment trusts (REITs). The fund's target allocation is to invest 65% of its total assets in underlying funds that invest primarily in fixed-income securities and 35% of its total assets in underlying funds that invest primarily in equity securities.

The fund's investment performance depends on the investment performance of the underlying funds in which it invests. Therefore, the risks associated with an investment in a fund of funds, such as the fund, are also the risks associated with an investment in the underlying funds.

Among the principal risks of investing in the fund and the underlying funds, which could adversely affect the fund's net asset value, yield and total return are:

Fund of Funds Risk	High Yield Risk	Active Trading Risk
Market Risk	Equity Securities Risk	Non-Diversification Risk
Interest Rate Risk	Foreign Securities Risk	Management Risk
Credit Risk	Developing Markets Securities Risk	Reinvestment Risk
U.S. Government Obligations Risk	Convertible Securities Risk	Dollar Roll Transaction Risk
High-Coupon U.S. Government Agency Mortgage-Backed Securities Risk	Derivatives Risk	Sector Fund Risk
Mortgage- and Asset-Backed Securities Risk	Leverage Risk	Limited Number of Holdings Risk
Prepayment Risk	Reverse Repurchase Agreement Risk	Risks Relating to Banking and Financial Services Industries
Liquidity Risk	Short Sales Risk	Lower Rated Securities Risk
	Real Estate Risk	Utilities Industry Risk

Please see "Investment Objectives, Strategies and Risks" for a description of these risks.

There is a risk that you could lose all or a portion of your investment in the fund and that the income that you receive from the fund may vary. The value of your investment in the fund will go up and down with the prices of the securities held by the underlying funds in which the fund invests.

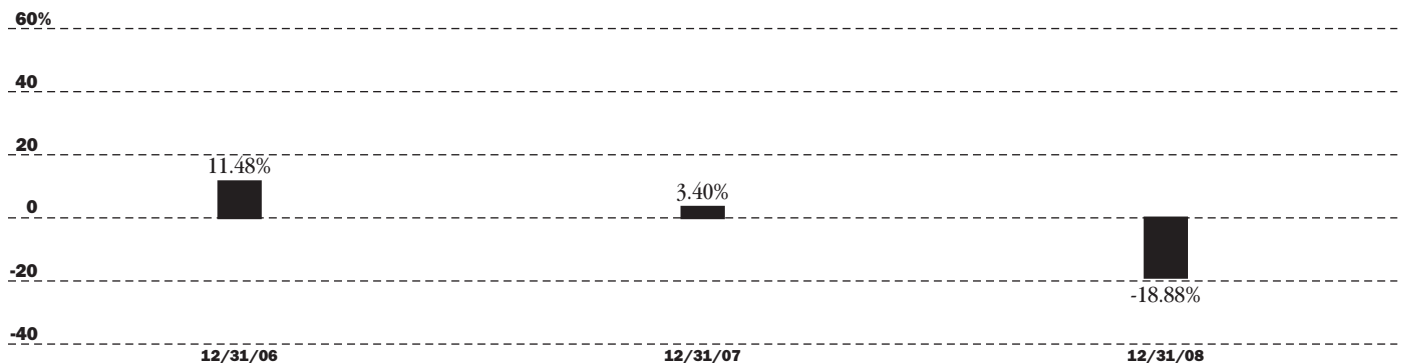

An investment in the fund is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Performance Information

The bar chart and table shown below provide an indication of the risks of investing in the fund. The fund's past performance (before and after taxes) is not necessarily an indication of its future performance.

ANNUAL TOTAL RETURNS

The following bar chart shows changes in the performance of the fund's Class A shares from year to year. The bar chart does not reflect sales loads. If it did, the annual total returns shown would be lower.

AIM INCOME ALLOCATION FUND

The Class A shares' year-to-date total return as of March 31, 2009 was -4.78% .

During the period shown in the bar chart, the highest quarterly return was 4.15% (quarter ended December 31, 2006) and the lowest quarterly return was -11.18% (quarter December 31, 2008).

PERFORMANCE TABLE

The following performance table compares the fund's performance to that of a broad-based securities market benchmark, a style specific benchmark and a peer group benchmark. The fund's performance reflects payment of sales loads, if applicable. The benchmarks may not reflect payments of fees, expenses or taxes. The fund is not managed to track the performance of any particular benchmark, including the benchmarks shown below, and consequently, the performance of the fund may deviate significantly from the performance of the benchmarks shown below.

Average Annual Total Returns

<i>(for the periods ended December 31, 2008)</i>	1 Year	Since Inception	Inception Date
Class A			10/31/05
Return Before Taxes	(23.36)%	(3.11)%	
Return After Taxes on Distributions	(25.05)	(4.79)	
Return After Taxes on Distributions and Sale of Fund Shares	(14.56)	(3.29)	
Class B			10/31/05
Return Before Taxes	(23.22)	(2.89)	
Class C			10/31/05
Return Before Taxes	(20.21)	(2.10)	
Class R			10/31/05
Return Before Taxes	(19.06)	(1.59)	
Class Y ¹			10/31/05 ¹
Return Before Taxes	(18.73)	(1.32)	
S&P 500 [®] Index ²	(36.99)	(6.84)	10/31/05
Custom Income Allocation Index ^{2,3}	(13.21)	0.95	10/31/05
Lipper Mixed-Asset Target Allocation Conservative Funds Index ^{2,4}	(16.20)	(0.46)	10/31/05

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. After-tax returns are shown for Class A shares only and after-tax returns for Class B, C, R and Y shares will vary.

¹ The returns shown for these periods are the returns of the actual performance of the fund's Class Y shares since inception blended with the historical performance of the fund's Class A shares at net asset value, which reflects the Rule 12b-1 fee, as well as any fee waivers or expense reimbursements applicable to Class A shares. The inception date shown in the table is that of the fund's Class A shares. The inception date of the fund's Class Y shares is October 3, 2008.

² The Standard & Poor's 500 Index is a market capitalization-weighted index covering all major areas of the U.S. economy. It is not the 500 largest companies, but rather the most widely held 500 companies chosen with respect to market size, liquidity, and their industry. The fund has also included the Custom Income Allocation Index, which the fund believes more closely reflects the performance of the securities in which the fund invests. In addition, the Lipper Mixed-Asset Target Allocation Conservative Funds Index (which may or may not include the fund) is included for comparison to a peer group.

³ The Custom Income Allocation Index, created by Invesco Aim to serve as a benchmark for AIM Income Allocation Fund, is composed of the following indexes: Russell 3000, MSCI EAFE, FTSE NAREIT Equity REITs and Barclays Capital U.S. Universal. The composition of the index may change from time to time based upon the target asset allocation of the fund. Therefore, the current composition of the index does not reflect its historical composition and will likely be altered in the future to better reflect the objective of the fund. The Russell 3000[®] Index is an unmanaged index considered representative of the U.S. stock market. The Russell 3000 Index is a trademark/service mark of the Frank Russell Co. Russell[®] is a trademark of the Frank Russell Co. The MSCI EAFE[®] Index is an unmanaged index considered representative of stocks of Europe, Australasia and the Far East. The FTSE NAREIT Equity REITs Index is an unmanaged index considered representative of U.S. REITs. The Barclays Capital U.S. Universal Index is composed of the following Barclays Capital indexes: U.S. Aggregate Index, U.S. High-Yield Corporate, 144A, Eurodollar, Emerging Markets and the non-ERISA portion of CMBS. Effective November 3, 2008, Lehman Brothers indexes were rebranded as Barclays Capital indexes.

⁴ The Lipper Mixed-Asset Target Allocation Conservative Funds Index is an equally weighted representation of the largest funds in the Lipper Mixed-Asset Target Allocation Conservative Funds category. These funds, by portfolio practice, maintain a mix of between 20% to 40% equity securities, with the remainder invested in bonds, cash and cash equivalents.

Fee Table and Expense Example

FEE TABLE

This table describes the fees and expenses that you may pay if you buy and hold shares of the fund.

Shareholder Fees

<i>(fees paid directly from your investment)</i>	Class A	Class B	Class C	Class R	Class Y
Maximum Sales Charge (Load) Imposed on Purchases <i>(as a percentage of offering price)</i>	5.50%	None	None	None	None
Maximum Deferred Sales Charge (Load) <i>(as a percentage of original purchase price or redemption proceeds, whichever is less)</i>	None ¹	5.00%	1.00%	None ¹	None

Annual Fund Operating Expenses²

<i>(expenses that are deducted from fund assets)</i>	Class A	Class B	Class C	Class R	Class Y ³
Management Fees ⁴	None	None	None	None	None
Distribution and/or Service (12b-1) Fees	0.25%	1.00%	1.00%	0.50%	None
Other Expenses ⁵	0.42	0.42	0.42	0.42	0.42%
Acquired Fund Fees and Expenses ⁶	0.71	0.71	0.71	0.71	0.71
Total Annual Fund Operating Expenses	1.38	2.13	2.13	1.63	1.13
Fee Waiver ⁵	0.39	0.39	0.39	0.39	0.39
Net Annual Fund Operating Expenses	0.99	1.74	1.74	1.24	0.74

¹ A contingent deferred sales charge may apply in some cases. See "General Information—Contingent Deferred Sales Charges (CDSCs)".

² There is no guarantee that actual expenses will be the same as those shown in the table.

³ Total Annual Fund Operating Expenses for Class Y shares are based on estimated amounts for the current fiscal year.

⁴ The fund does not pay a management fee directly, however, the advisor receives a fee indirectly as a result of the funds' investments in underlying funds also advised by Invesco Aim. See Acquired Fund Fees and Expenses below.

⁵ The fund's advisor has contractually agreed to reimburse expenses to the extent necessary to limit Other Expenses (excluding Rule 12b-1 fees and certain items discussed below) to 0.03% on Class A, Class B, Class C, Class R and Class Y shares, through at least June 30, 2009. Therefore, the fund's operating expenses are limited to 0.28%, 1.03%, 1.03%, 0.53% and 0.03% for Class A, Class B, Class C, Class R and Class Y shares, respectively. In determining the advisor's obligation to reimburse expenses, the following expenses are not taken into account, and could cause Other Expenses to exceed the limits: (i) interest; (ii) taxes; (iii) dividend expense on short sales; (iv) extraordinary items; (v) expenses related to a merger or reorganization, as approved by the fund's Board of Trustees; and (vi) expenses that the fund has incurred but did not actually pay because of an expense offset arrangement. Currently, the expense offset arrangements from which the Fund may benefit are in the form of credits that the fund receives from banks where the fund or its transfer agent has deposit accounts in which it holds uninvested cash. These credits are used to pay certain expenses incurred by the fund.

⁶ Acquired Fund Fees and Expenses are not operating expenses of the fund directly, but are fees and expenses, including management fees, of the investment companies in which the fund invests. As a result, the Net Annual Fund Operating Expenses will exceed the expense limits above. You incur these fees and expenses indirectly through the valuation of the fund's investment in those investment companies. The impact of the Acquired Fund Fees and Expenses are included in the total returns of the fund.

If a financial institution is managing your account, you may also be charged a transaction or other fee by such financial institution. As a result of 12b-1 fees, long-term shareholders in the fund may pay more than the maximum permitted initial sales charge.

EXPENSE EXAMPLE

This example is intended to help you compare the costs of investing in different classes of the fund with the cost of investing in other mutual funds.

The expense example assumes you:

- (i) invest \$10,000 in the fund for the time periods indicated;
- (ii) redeem all of your shares at the end of the periods indicated;
- (iii) earn a 5% return on your investment before operating expenses each year;
- (iv) incur the same amount in operating expenses each year (after giving effect to any applicable contractual fee waivers and/or expense reimbursements and includes the estimated indirect expenses of the underlying funds); and
- (v) incur applicable initial sales charges (see “General Information—Choosing a Share Class” section of this prospectus for applicability of initial sales charge).

To the extent fees are waived and/or expenses are reimbursed voluntarily, your expenses will be lower. Although your actual returns and costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class A	\$645	\$927	\$1,229	\$2,084
Class B	677	929	1,308	2,240 ¹
Class C	277	629	1,108	2,431
Class R	126	476	850	1,900
Class Y	76	320	585	1,340

You would pay the following expenses if you did not redeem your shares:

	1 Year	3 Years	5 Years	10 Years
Class A	\$645	\$927	\$1,229	\$2,084
Class B	177	629	1,108	2,240 ¹
Class C	177	629	1,108	2,431
Class R	126	476	850	1,900
Class Y	76	320	585	1,340

¹ Assumes conversion of Class B shares to Class A shares, which occurs on or about the end of the month which is at least 8 years after the date on which shares were purchased, lowering your annual fund operating expenses from that time on.

Hypothetical Investment and Expense Information

The settlement agreement between Invesco Aim Advisors, Inc. and certain of its affiliates and the New York Attorney General requires Invesco Aim Advisors, Inc. and certain of its affiliates to provide certain hypothetical information regarding investment and expense information. The chart below is intended to reflect the annual and cumulative impact of the fund’s expenses, including investment advisory fees and other fund costs, on the fund’s return over a 10-year period. The example reflects the following:

- You invest \$10,000 in the fund and hold it for the entire 10-year period;
- Your investment has a 5% return before expenses each year;
- The fund’s current annual expense ratio includes any applicable contractual fee waiver or expense reimbursement for the period committed and includes the estimated indirect expenses of the underlying funds;
- Hypotheticals both with and without any applicable initial sales charge applied (see “General Information—Choosing a Share Class” section of this prospectus for applicability of initial sales charge); and
- There is no sales charge on reinvested dividends.

There is no assurance that the annual expense ratio will be the expense ratio for the fund classes for any of the years shown. To the extent that Invesco Aim Advisors, Inc. and certain of its affiliates make any fee waivers and/or expense reimbursements pursuant to a voluntary arrangement, your actual expenses may be less. This is only a hypothetical presentation made to illustrate what expenses and returns would be under the above scenarios; your actual returns and expenses are likely to differ (higher or lower) from those shown below.

Class A (Includes Maximum Sales Charge)	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Year 8	Year 9	Year 10
Annual Expense Ratio ¹	0.99%	1.38%	1.38%	1.38%	1.38%	1.38%	1.38%	1.38%	1.38%	1.38%
Cumulative Return Before Expenses	5.00%	10.25%	15.76%	21.55%	27.63%	34.01%	40.71%	47.75%	55.13%	62.89%
Cumulative Return After Expenses	(1.71)%	1.85%	5.53%	9.35%	13.31%	17.42%	21.67%	26.07%	30.63%	35.36%
End of Year Balance	\$9,828.95	\$10,184.75	\$10,553.44	\$10,935.48	\$11,331.34	\$11,741.53	\$12,166.58	\$12,607.01	\$13,063.38	\$13,536.28

¹ Your actual expenses may be higher or lower than those shown.

² The hypothetical assumes you hold your investment for a full 10 years. Therefore, any applicable deferred sales charge that might apply in years one through six for Class B and year one for Class C has not been deducted.

Investment Objectives, Strategies and Risks

Objectives and Strategies

The fund's investment objective is to achieve a high level of current income with growth of capital as a secondary objective. The fund's investment objective may be changed by the Board of Trustees without shareholder approval.

The fund seeks to meet its objective by investing its assets in a selection of underlying funds which primarily invest in international or domestic equities, fixed income securities or REITs. The fund's target allocation is to invest 65% of its total assets in underlying funds that invest primarily in fixed-income securities and 35% of its total assets in underlying funds that invest primarily in equity securities.

The advisor uses a three-step process to create the fund's portfolio. The first step is a strategic asset allocation by the advisor among broad asset classes. The second step involves the actual selection by the advisor of underlying funds to represent the broad asset classes and the determination by the advisor of target weightings in these underlying funds. The third step is the ongoing monitoring of a fund's asset class allocations, underlying funds and target weightings.

The advisor monitors the selection of underlying funds to ensure that they continue to conform to the fund's asset class allocations and rebalances the fund's investments in the underlying funds on an annual basis to keep them within their target weightings. However, the advisor has the ability to rebalance on a more frequent basis if it believes it is appropriate to do so. The advisor may change the fund's asset class allocations, the underlying funds or the target weightings in the underlying funds without shareholder approval. A list of the underlying funds and their target weightings is located in the fund's Statement of Additional Information.

The underlying funds may invest in synthetic and derivative instruments. Synthetic and derivative instruments are investments that have economic characteristics similar to an underlying fund's direct investments. Synthetic and derivative instruments that an underlying fund may

invest in include warrants, futures contracts, options, exchange-traded funds and American Depositary Receipts. Synthetic and derivative instruments may have the effect of leveraging an underlying fund's portfolio.

The fund typically maintains a portion of its assets in cash, which is generally invested in money market funds advised by the fund's advisor. The fund holds cash to handle its daily cash needs, which include payment of fund expenses, redemption requests and securities transactions. The amount of cash held by the fund may increase if the fund takes a temporary defensive position. The fund may take a temporary defensive position when it receives unusually large redemption requests, or if there are inadequate investment opportunities due to adverse market, economic, political or other conditions. A larger amount of cash could negatively affect the fund's investment results in a period of rising market prices; conversely it could reduce the magnitude of a fund's loss in the event of falling market prices and provide liquidity to make additional investments or to meet redemptions. As a result, the fund may not achieve its investment objective.

Risks

The principal risks of investing in the fund and the underlying funds are:

Fund of Funds Risk—The fund pursues its investment objective by investing its assets in other underlying funds rather than investing directly in stocks, bonds, cash or other investments. The fund's investment performance depends on the investment performance of the underlying funds in which it invests. Therefore, the risks associated with an investment in a fund of funds, like the fund, are also the risks associated with an investment in the underlying funds.

There is a risk that the advisor's evaluations and assumptions regarding the fund's broad asset classes or the underlying funds in which the fund invests may be incorrect based on actual market conditions. There is a risk that the fund will vary from the target weightings in the underlying funds due to factors such as market fluctuations. There can be no assurance that the underlying funds will achieve their investment objectives, and the performance of the underlying funds may be lower than the asset class which they were selected to represent. The underlying funds may change their investment objectives or policies without the approval of the fund. If that were to occur, the fund might be forced to withdraw its investment from the underlying fund at a time that is unfavorable to the fund.

Based on the structure of the fund, the fund is limited to investing in underlying funds that are part of The AIM Family of Funds®. Moreover, the advisor has the ability to select and substitute the underlying funds in which the fund invests, and may be subject to potential conflicts of interest in selecting underlying funds because it may receive higher fees from certain underlying funds than others. However, as a fiduciary to the fund, the advisor is required to act in the fund's best interest when selecting underlying funds.

Because the fund is a fund of funds, the fund is subject to the risks associated with the underlying funds in which it invests. The risks of an investment in the underlying funds are set forth below:

Market Risk—The prices of and the income generated by securities held by the underlying funds may decline in response to certain events, including those directly involving the companies whose securities are owned by the underlying funds; general economic and market conditions; regional or global economic instability; and currency and interest rate fluctuations.

Interest Rate Risk—Interest rate risk refers to the risk that bond prices generally fall as interest rates rise; conversely, bond prices generally rise as interest rates fall. Specific bonds differ in their sensitivity to changes in interest rates depending on specific characteristics of each bond. A measure investors commonly use to determine this sensitivity is called duration. The longer the duration of a particular bond, the greater is its price sensitivity to interest rates. Similarly, a longer duration portfolio of securities has greater price sensitivity. Duration is determined by a number of factors including coupon rate, whether the coupon is fixed or floating, time to maturity, call or put features, and various repayment features.

Credit Risk—Credit risk is the risk of loss on an investment due to the deterioration of an issuer's financial health. Such a deterioration of financial health may result in a reduction of the credit rating of the issuer's securities and may lead to the issuer's inability to honor its contractual obligations including making timely payment of interest and principal. Credit ratings are a measure of credit quality. Although a downgrade or upgrade of a bond's credit ratings may or may not affect its price, a decline in credit quality may make bonds less attractive, thereby driving up the yield on the bond and driving down the price. Declines in credit quality can result in bankruptcy for the issuer and permanent loss of investment.

U.S. Government Obligations Risk—The underlying funds may invest in obligations issued by agencies and instrumentalities of the U.S. Government. These obligations vary in the level of support they receive from the U.S. Government. They may be: (i) supported by the full faith and credit of the U.S. Treasury; (ii) supported by the right of the issuer to borrow from the U.S. Treasury; (iii) supported by the discretionary authority of the U.S. Government to purchase the issuer's obligations; or (iv) supported only by the credit of the issuer. The U.S. Government may choose not to provide financial support to U.S. Government sponsored agencies or instrumentalities if it is not legally obligated to do so, in which case, if the issuer defaulted, the underlying fund holding securities of such issuer might not be able to recover its investment from the U.S. Government.

High-Coupon U.S. Government Agency Mortgage-Backed Securities Risk—The underlying funds may invest in high-coupon U.S. Government agency mortgage-backed securities. These provide a higher coupon at the time of purchase than current prevailing market interest rates. The underlying funds may purchase such securities at a premium. If these securities experience a faster principal prepayment rate than expected, both the market value of and income from such securities will decrease. The prices of high-coupon U.S. Government agency mortgage-backed securities fall more slowly when interest rates rise than do prices of traditional fixed-rate securities. Some of the securities purchased by the

underlying funds are not guaranteed by the U.S. Government. The issuer of a security may default or otherwise be unable to honor a financial obligation.

Mortgage- and Asset-Backed Securities Risk—Certain of the underlying funds may invest in mortgage and asset-backed securities. These securities are subject to prepayment or call risk, which is the risk that payments from the borrower may be received earlier or later than expected due to changes in the rate at which the underlying loans are prepaid. Faster prepayments often happen when market interest rates are falling. As a result, an underlying fund may need to reinvest these early payments at lower interest rates, thereby reducing its income. Conversely, when interest rates rise, prepayments may happen more slowly, causing the underlying loans to be outstanding for a longer time, which can cause the market value of the security to fall because the market may view its interest rate as too low for a longer-term investment.

Prepayment Risk—The ability of an issuer of a floating rate loan or debt security to repay principal prior to maturity can limit the potential for gains by the underlying fund. Such prepayments may require the fund to replace the loan or debt security with a lower yielding security. This may adversely affect the underlying fund's yield.

Liquidity Risk—A majority of an underlying fund's assets are likely to be invested in loans and securities that are less liquid than those traded on national exchanges. Loans and securities with reduced liquidity involve greater risk than securities with more liquid markets. Market quotations for such loans and securities may vary over time, and if the credit quality of a loan unexpectedly declines, secondary trading of that loan may decline for a period of time. In the event that the fund voluntarily or involuntarily liquidates portfolio assets during periods of infrequent trading, it may not receive full value for those assets.

A security is considered to be illiquid if the fund is unable to sell such security at a fair price within a reasonable amount of time. A security may be deemed illiquid due to a lack of trading volume in the security or if the security is privately placed and not traded in a public market or is otherwise restricted from trading. The underlying fund may be unable to sell its illiquid securities at the time or price it desires and could lose its entire investment in such securities.

High Yield Risk—High yield risk is a form of credit risk. Securities that are below investment grade are regarded as having predominately speculative characteristics with respect to the capacity to pay interest and repay principal. Lower rated securities may be more susceptible to real or perceived adverse economic and competitive industry conditions than higher grade securities. The prices of lower-rated securities have been found to be less sensitive to interest rate changes than more highly rated investments, but more sensitive to adverse economic downturns or individual corporate developments. Yields on lower-rated securities will fluctuate. If the issuer of lower-rated securities defaults, the underlying fund may incur additional expenses to seek recovery.

The secondary markets in which lower-rated securities are traded may be less liquid than the market for higher grade securities. Less liquidity in the secondary trading markets could adversely affect the price at which the underlying fund could sell a particular lower-rated security when necessary to meet liquidity needs or in response to a specific economic event, such as a deterioration in the creditworthiness of the issuer, and could adversely affect and cause large fluctuations in the net asset value of the underlying fund's shares. Adverse publicity and investor perceptions may decrease the values and liquidity of high yield securities.

The loans in which an underlying fund may invest in are typically non-investment grade which involve a greater risk of default on interest and principal payments and of price changes due to the changes in the credit quality of the issuer.

The value of lower quality floating rate loans can be more volatile due to increased sensitivity to adverse issuer, political, regulatory, market, or economic developments. A significant portion of an underlying fund's floating rate investments may be issued in connection with highly leveraged transactions. These obligations are subject to greater credit risks, including a greater possibility of default or bankruptcy of the borrower.

The terms of the senior secured floating rate loans in which an underlying fund typically invests require that collateral be maintained to support payment of the obligations. However, the value of the collateral may decline after the underlying fund invests. There is also a risk that the value of the collateral may not be sufficient to cover the amount owed to the underlying fund. In addition, collateral securing a loan may be found invalid, may be used to pay other outstanding obligations of the borrower under applicable law or may be difficult to sell. In the event that a borrower defaults, the underlying fund's access to the collateral may be limited by bankruptcy or other insolvency laws. There is also the risk that the collateral may be difficult to liquidate, or that a majority of the collateral may be illiquid. As a result, the underlying fund may not receive payments to which it is entitled.

Equity Securities Risk—The prices of equity securities change in response to many factors including the historical and prospective earnings of the issuer, the value of its assets, general economic conditions, interest rates, investor perceptions, and market liquidity. These factors will probably affect the equity securities of smaller companies more than the equity securities of larger, more-established companies. Also, because equity securities of smaller companies may not be traded as often as equity securities of larger, more-established companies, it may be difficult or impossible for the underlying fund to sell securities at a desirable price.

Foreign Securities Risk—The dollar value of an underlying fund's foreign investments will be affected by changes in the exchange rates between the dollar and the currencies in which those investments are traded. The value of an underlying fund's foreign investments may be adversely affected by political and social instability in their home countries, by changes in economic or taxation policies in those countries, or by the difficulty in enforcing obligations in those countries. Foreign companies generally may be subject to less stringent regulations than U.S. companies, including financial reporting requirements and auditing and accounting controls. As a result, there generally is less publicly available information about foreign companies than about U.S. companies. Trading in many foreign securities may be less liquid and more volatile than U.S. securities due to the size of the market or other factors.

Developing Markets Securities Risk—The factors described above for “Foreign Securities Risk” may affect the prices of securities issued by foreign companies located in developing countries more than those in countries with mature economies. For example, many developing countries (i.e., those that are in the initial stages of their industrial cycle) have, in the past, experienced high rates of inflation or sharply devalued their currencies against the U.S. dollar, thereby causing the value of investments in companies located in those countries to decline. Transaction costs are often higher in developing countries and there may be delays in settlement procedures.

Convertible Securities Risk—The values of convertible securities in which an underlying fund may invest will be affected by market interest rates, the risk that the issuer may default on interest or principal payments and the value of the underlying common stock into which these securities may be converted. Specifically, because these types of securities pay fixed interest and dividends, their values may fall if market interest rates rise and rise if market interest rates fall. Additionally, an issuer may have the right to buy back certain of the convertible securities at a time and a price that is unfavorable to the underlying fund.

Derivatives Risk—Derivatives are financial contracts whose value depends on or is derived from an underlying asset (including an underlying security), reference rate or index. Derivatives may be used as a substitute for purchasing the underlying asset or as a hedge to reduce exposure to risks. The use of derivatives involves risks similar to, as well as risks different from, and possibly greater than, the risks associated with investing directly in securities or other more traditional instruments. Risks to which derivatives may be subject include market, interest rate, credit, leverage and management risks. They may also be more difficult to purchase or sell or value than other investments. When used for hedging or reducing exposure, the derivative may not correlate perfectly with the underlying asset, reference rate or index. An underlying fund investing in a derivative could lose more than the cash amount invested. Over the counter derivatives are also subject to counterparty risk, which is the risk that the other party to the contract will not fulfill its contractual obligation to complete the transaction with the underlying fund.

Leverage Risk—Leverage exists when an underlying fund purchases or sells an instrument or enters into a transaction without investing cash in an amount equal to the full economic exposure of the instrument or transaction. Such instruments may include, among others, reverse repurchase agreements, written options, derivatives and transactions may include the use of when-issued, delayed delivery or forward commitment transactions. The underlying fund mitigates leverage risk by segregating or earmarking liquid assets or otherwise covers transactions that may give rise to such risk. To the extent that the underlying fund is not able to close out a leveraged position because of market illiquidity, the underlying fund’s liquidity may be impaired to the extent that it has a substantial portion of liquid assets segregated or earmarked to cover obligations and may liquidate portfolio positions when it may not be advantageous to do so. There can be no assurance that the underlying fund’s leverage strategy will be successful.

Reverse Repurchase Agreement Risk—Reverse repurchase agreements are agreements that involve the sale by an underlying fund of securities to financial institutions such as banks and broker-dealers, with an agreement that an underlying fund will repurchase the securities at an agreed upon price and date. Reverse repurchase agreements involve the risk that the market value of securities to be purchase by an underlying fund may decline below the price at which an underlying fund is obligated to repurchase the securities, or that the other party may default on its obligation, so that an underlying fund is delayed or prevented from completing the transaction. In the event the buyer or securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, an underlying fund’s use of the proceeds from the sale of securities may be restricted pending a determination by the other party, or its trustee or receiver, whether to enforce the underlying fund’s obligation to repurchase the shares.

Short Sales Risk—If the underlying fund sells a security short that it does not own, and the security increases in value, the underlying fund will have to pay the higher price to purchase the security. Since there is no limit on how much the price of the security can increase, the underlying fund’s exposure is unlimited. The more the underlying fund pays to purchase the security, the more it will lose on the transaction and the more the price of your shares will be affected. If the underlying fund sells a security that it owns (short sale against the box), any future losses in the fund’s long position should be reduced by a gain in the short position. Conversely, any gain in the long position should be reduced by a loss in the short position. The underlying fund will also incur transaction costs to engage in short sales.

Real Estate Risk—Because one of the underlying funds concentrates its assets in the real estate industry, the performance of such underlying fund will be closely linked to the performance of the real estate markets. Property values may fall due to increasing vacancies or declining rents resulting from economic, legal, cultural or technological developments.

Real estate company share prices may drop because of the failure of borrowers to pay their loans and poor management. Many real estate companies, including real estate investment trusts (REITs), utilize leverage (and some may be highly leveraged), which increases investment risk and could adversely affect a real estate company’s operations and market value in periods of rising interest rates. Financial covenants related to real estate company leveraging may affect the company’s ability to operate effectively. Real estate risks may also arise where real estate companies fail to carry adequate insurance, or where a real estate company may become liable for removal or other costs related to environmental contamination.

Real estate companies tend to be small to medium-sized companies. Real estate company shares, like other smaller company shares, can be more volatile than, and perform differently from, larger company shares. There may be less trading in a smaller company’s shares, which means that buy and sell transactions in those shares could have a larger impact on the share’s price than is the case with larger company shares.

The underlying fund could conceivably hold real estate directly if a company defaults on debt securities the underlying fund owns. In that event, an investment in the underlying fund may have additional risks relating to direct ownership in real estate, including environmental liabilities, difficulties in valuing and selling real estate, declines in the value of the properties, risks relating to general and local economic

conditions, changes in the climate for real estate, increases in taxes, expenses and costs, changes in laws, casualty and condemnation losses, rent control limitations and increases in interest rates.

The value of an underlying fund's investment in REITs is affected by the factors listed above, as well as the management skill of the persons managing the REIT. Because REITs have expenses of their own, the underlying fund will bear a proportionate share of those expenses.

For U.S. federal income tax purposes, a substantial portion of the distributions paid by an underlying fund may be taxable as ordinary income. This is due to the fund's investment in REITs and other real estate companies that earn income from rents, mortgage payments and other sources of ordinary income.

Active Trading Risk—Certain of the underlying funds may engage in active and frequent trading of portfolio securities to achieve their investment objectives. If an underlying fund does trade in this way, it may incur increased costs, which can lower the actual return of the underlying fund. Active trading may also increase short term gains and losses, which may affect the taxes that must be paid.

Non-Diversification Risk—Certain of the underlying funds in which the fund invests are “non-diversified”, meaning they can invest a greater portion of their assets in the obligations of securities of any single issuer than a diversified fund. To the extent that a large percentage of the underlying fund's assets may be invested in a limited number of issuers, a change in the value of the issuers' securities could affect the value of the fund more than would occur in a diversified fund.

Management Risk—There is no guarantee that the investment techniques and risk analyses used by the underlying fund's portfolio managers will produce the desired results.

Reinvestment Risk—Reinvestment risk is the risk that a bond's cash flows (coupon income and principal repayment) will be reinvested at an interest rate below that on the original bond. If interest rates decline, the underlying bond may rise in value, but the cash flows received from that bond may have to be invested at a lower interest rate.

Dollar Roll Transaction Risk—In a dollar roll transaction, the underlying fund sells a mortgage-backed security held by the underlying fund to a financial institution such as a bank or broker-dealer, and simultaneously agrees to purchase a substantially similar security (same type, coupon and maturity) from the institution at an agreed upon price and future date. Dollar roll transactions involve the risk that the market value of the securities retained by the underlying fund may decline below the price of the securities that the underlying fund has sold but is obligated to repurchase under the agreement. In the event the buyer of securities under a dollar roll transaction files for bankruptcy or becomes insolvent, the underlying fund's use of the proceeds from the sale of the securities may be restricted pending a determination by the other party or its trustee or receiver, whether to enforce the underlying fund's obligation to repurchase the securities.

Sector Fund Risk—An underlying fund's investments are concentrated in a comparatively narrow segment of the economy, the utilities sector. This means that the fund's investment concentration in the utilities sector is higher than most mutual funds in the broad securities market. Consequently, an underlying fund may tend to be more volatile than other mutual funds, and consequently the value of an investment in the fund may tend to rise and fall more rapidly.

Limited Number of Holdings Risk—Because a large percentage of an underlying fund's assets may be invested in a limited number of securities, a change in the value of these securities could significantly affect the value of your investment in an underlying fund.

Risks Relating to Banking and Financial Services Industries—To the extent that the underlying fund is concentrated in securities of issuers in the banking and financial services industries, the underlying fund's performance will depend to a greater extent on the overall condition of those industries. Financial services companies are highly dependent on the supply of short-term financing. The value of securities of issuers in the banking and financial services industry can be sensitive to changes in government regulations and interest rates and to economic downturns in the United States and abroad.

Lower Rated Securities Risk—Securities that are below investment grade are regarded as having predominately speculative characteristics with respect to the capacity to pay interest and repay principal. Lower rated securities may be more susceptible to real or perceived adverse economic and competitive industry conditions than higher grade securities. The prices of lower-rated securities have been found to be less sensitive to interest rate changes than more highly rated investments, but more sensitive to adverse economic downturns or individual corporate developments. Yields on lower-rated securities will fluctuate. If the issuer of lower-rated securities defaults, the fund may incur additional expenses to seek recovery.

The secondary markets in which lower-rated securities are traded may be less liquid than the market for higher grade securities. Less liquidity in the secondary trading markets could adversely affect the price at which the fund could sell a particular lower-rated security when necessary to meet liquidity needs or in response to a specific economic event, such as a deterioration in the creditworthiness of the issuer, and could adversely affect and cause large fluctuations in the net asset value of the fund's shares. Adverse publicity and investor perceptions may decrease the values and liquidity of high yield securities.

Utilities Industry Risk—Governmental regulation, difficulties in obtaining adequate financing and investment return, environmental issues, prices of fuel for generation of electricity, availability of natural gas, risks associated with power marketing and trading, and risks associated with nuclear power facilities may adversely affect the market value of the underlying fund's holdings. The recent trend towards deregulation in the utility industries presents special risks. Some companies may be faced with increased competition and may become less profitable.

Disclosure of Portfolio Holdings

The fund's portfolio holdings are disclosed on a regular basis in its semi-annual and annual reports to shareholders, and on Form N-Q, which is filed with the Securities and Exchange Commission (SEC) within 60 days of the fund's first and third fiscal quarter-ends. In addition, portfolio holdings information for the fund is available at <http://www.invescoaim.com>. To reach this information, access the fund's overview page on the website. Links to the following fund information are located in the upper right side of this website page:

Information	Approximate Date of Website Posting	Information Remains Posted on Website
Top ten holdings as of month-end	15 days after month-end	Until posting of the following month's top ten holdings
Complete portfolio holdings as of calendar quarter-end	30 days after calendar quarter-end	For one year

A description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio holdings is available in the fund's Statement of Additional Information, which is available at <http://www.invescoaim.com>.

Fund Management

THE ADVISORS

Invesco Aim serves as the fund's investment advisor and manages the investment operations of the fund and has agreed to perform or arrange for the performance of the fund's day-to-day management. The advisor is located at 11 Greenway Plaza, Suite 100, Houston, Texas 77046-1173. The advisor has acted as an investment advisor since its organization in 1976. Today, the advisor, together with its subsidiaries, advises or manages over 225 investment portfolios, including the fund, encompassing a broad range of investment objectives.

The following affiliates of the advisor (collectively, the affiliated sub-advisors) serve as sub-advisors to the fund and may be appointed by the advisor from time to time to provide discretionary investment management services, investment advice, and/or order execution services to the fund:

Invesco Asset Management Deutschland GmbH (Invesco Deutschland), located at Bleichstrasse 60-62, Frankfurt, Germany 60313, which has acted as an investment advisor since 1998.

Invesco Asset Management Limited (Invesco Asset Management), located at 30 Finsbury Square, London, EC2A 1AG, United Kingdom, which has acted as an investment advisor since 2001.

Invesco Asset Management (Japan) Limited (Invesco Japan), located at 25th Floor, Shiroyama Trust Tower, 3-1, Toranomom 4-chome, Minato-ku, Tokyo 105-6025, Japan, which has acted as an investment advisor since 1996.

Invesco Australia Limited (Invesco Australia), located at 333 Collins Street, Level 26, Melbourne Vic 3000, Australia, which has acted as an investment advisor since 1983.

Invesco Global Asset Management (N.A.), Inc. (Invesco Global), located at 1555 Peachtree Street, N.E., Atlanta, Georgia 30309, which has acted as an investment advisor since 1997.

Invesco Hong Kong Limited (Invesco Hong Kong), located at 32nd Floor, Three Pacific Place, 1 Queen's Road East, Hong Kong, which has acted as an investment advisor since 1994.

Invesco Institutional (N.A.), Inc. (Invesco Institutional), located at 1555 Peachtree Street, N.E., Atlanta, Georgia 30309, which has acted as an investment advisor since 1988.

Invesco Senior Secured Management, Inc. (Invesco Senior Secured), located at 1166 Avenue of the Americas, New York, New York 10036, which has acted as an investment advisor since 1992.

Invesco Trimark Ltd. (Invesco Trimark), located at 5140 Yonge Street, Suite 900, Toronto, Ontario, Canada M2N 6X7, which has acted as an investment advisor since 1981.

It is anticipated that, on or about the end of the fourth quarter of 2009, Invesco Aim, Invesco Global and Invesco Institutional will be combined into a single entity, which will be named Invesco Advisers, inc. The combined entity will serve as the fund's investment adviser. Invesco Advisers, Inc. will provide substantially the same services as are currently provided by the three existing separate entities. Further information about this combination will be posted on <http://www.invescoaim.com> on or about the closing date of the transaction and will be available in the fund's Statement of Additional Information.

AIM Floating Rate Fund, one of the underlying funds, along with numerous unrelated funds and financial institutions, has been named as a defendant in a private civil lawsuit filed in the United States Bankruptcy Court, Southern District of New York. (Adelphia Communications Corp. and its Affiliate Debtors in Possession and Official Committee of Unsecured Creditors of Adelphia v. Bank of America, individually and as Agent for various Banks Party to Credit Agreements, et al., Case No. 02-41729). This lawsuit seeks avoidance of certain loans of Adelphia Communications Corp. and alleges that the purchasers of Adelphia's bank debt knew, or should have known, that the loan proceeds would not benefit Adelphia, but instead would be used to enrich Adelphia insiders. The amount sought to be recovered from the fund in the Adelphia lawsuit is not specified in such lawsuit. On June 17, 2008, the Court, in the Adelphia action, granted defendants' Motion to Dismiss and dismissed all claims against the

fund. On July 17, 2008, the defendants filed a Motion to make the Dismissal a Final Judgment, which the court granted. Adelphia appealed the ruling, and the appeal is pending.

Civil lawsuits, including a regulatory proceeding and purported class action and shareholder derivative suits, have been filed against certain AIM funds, INVESCO Funds Group, Inc. (IFG) (the former investment advisor to certain AIM funds), Invesco Aim, Invesco Aim Distributors, Inc. (Invesco Aim Distributors) (the distributor of the AIM funds) and/or related entities and individuals, depending on the lawsuit, alleging among other things: (i) that the defendants permitted improper market timing and related activity in the funds; and (ii) that certain funds inadequately employed fair value pricing.

Additional civil lawsuits related to the above or other matters may be filed by regulators or private litigants against AIM funds, IFG, Invesco Aim, Invesco Aim Distributors and/or related entities and individuals in the future. You can find more detailed information concerning all of the above matters, including the parties to the civil lawsuits and summaries of the various allegations and remedies sought in such lawsuits, in the fund's Statement of Additional Information.

As a result of the matters discussed above, investors in the AIM funds might react by redeeming their investments. This might require the funds to sell investments to provide for sufficient liquidity and could also have an adverse effect on the investment performance of the funds.

ADVISOR COMPENSATION

The advisor does not receive a management fee from the fund.

Invesco Aim, not the fund, pays sub-advisory fees, if any.

A discussion regarding the basis for the Board of Trustees' approval of the investment advisory agreement and investment sub-advisory agreements of the fund is available in the fund's most recent report to shareholders for the six-month period ended June 30.

PORTFOLIO MANAGER

The fund is not actively managed, however, Gary Wendler, Director of Product Line Strategy and Investment Services for an affiliate of the advisor, assisted by a group of research professionals, determines the asset class allocation, underlying fund selections and target weightings for the fund. He has been responsible for the fund since its inception in 2005 and has been associated with the advisor and/or its affiliates since 1995.

The underlying funds are actively managed by investment professionals. More information on the investment professionals managing the underlying funds may be found on our website <http://www.invescoaim.com>. The website is not a part of this prospectus.

The fund's Statement of Additional Information provides additional information about the portfolio manager's investments in the fund, a description of his compensation structure, and information regarding other accounts he manages.

Other Information

SALES CHARGES

Purchases of Class A shares of AIM Income Allocation Fund are subject to the maximum 5.50% initial sales charge as listed under the heading "Category I Initial Sales Charges" in the "General Information—Initial Sales Charges (Class A Shares Only)" section of this prospectus. Certain purchases of Class A shares at net asset value may be subject to a contingent deferred sales charge. Purchases of Class B and Class C shares are subject to a contingent deferred sales charge. Certain purchases of Class R shares may be subject to a contingent deferred sales charge. For more information on contingent deferred sales charges, see "General Information—Contingent Deferred Sales Charges (CDSCs)" section of this prospectus.

DIVIDENDS AND DISTRIBUTIONS

The fund expects, based on its investment objectives and strategies, that its income will consist of both ordinary income and capital gains.

Dividends

The fund generally declares and pays dividends from net investment income, if any, quarterly.

Capital Gains Distributions

The fund generally distributes long-term and short-term capital gains (net of any capital loss carryovers), if any, annually, but may declare and pay capital gains distributions more than once per year as permitted by law. Due to the 2008-2009 economic downturn, many funds have experienced capital losses and unrealized depreciation in value of investments, the effect of which may be to reduce or eliminate capital gains distributions for a period of time. Even though the fund may experience a current year loss, it may nonetheless distribute prior year capital gains. Capital gains distributions may vary considerably from year to year as a result of the fund's normal investment activities and cash flows.

Financial Highlights

The financial highlights table is intended to help you understand the fund's financial performance. Certain information reflects financial results for a single fund share.

The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the fund (assuming reinvestment of all dividends and distributions).

The information has been audited by PricewaterhouseCoopers LLP, whose report, along with the fund's financial statements, is included in the fund's annual report, which is available upon request.

^(a) Calculated using average shares outstanding.

^(b) Includes adjustments in accordance with accounting principles generally accepted in the United States of America and as such, the net asset value for financial reporting purposes and the returns based upon those net asset values may differ from the net asset value and returns for shareholder transactions. Does not include sales charges and is not annualized for periods less than one year, if applicable.

^(c) In addition to the fees and expenses which the Fund bears directly; the Fund indirectly bears a pro rata share of the fees and expenses of the underlying funds in which the Fund invests. Because the underlying funds have varied expenses and fee levels and the Fund may own different proportions at different times, the amount of fees and expenses incurred indirectly by the Fund will vary. Estimated underlying fund expenses are not expenses that are incurred directly by your Fund. They are expenses that are incurred directly by the underlying funds and are deducted from the value of the funds your Fund invests in. The effect of the estimated underlying fund expenses that you bear indirectly is included in your Fund's total return. Estimated acquired fund fees from underlying funds were 0.71% for the year ended December 31, 2008; 0.69% for the year ended December 31, 2007 and for the period October 31, 2005 (commencement date) to December 31, 2005; 0.64% for the year ended December 31, 2006.

^(d) Portfolio turnover is calculated at the fund level and is not annualized for periods less than one year, if applicable.

^(e) Ratios are based on average daily net assets (000's omitted) of \$55,636, \$9,933, \$23,290, \$442 and \$228 for Class A, Class B, Class C, Class R and Class Y shares, respectively.

^(f) Commencement date of Class A, Class B, Class C and Class R shares was October 31, 2005 and October 3, 2008 for Class Y shares.

^(g) Annualized.

General Information

In addition to the fund, Invesco Aim serves as investment advisor to many other mutual funds that are offered to retail investors. The following information is about all the AIM funds that offer retail share classes.

CHOOSING A SHARE CLASS

Each of the funds offers multiple classes of shares. Each class represents an interest in the same portfolio of investments. Certain classes have higher expenses than other classes which may lower the return on your investment when compared to a less expensive class. In deciding which class of shares to purchase, you should consider the following attributes of the various share classes, among other things: (i) the eligibility requirements that apply to purchases of a particular class, (ii) the initial sales charges and contingent deferred sales charges (CDSCs), if any, applicable to the class, (iii) the 12b-1 fee, if any, paid by the class, and (iv) any services you may receive from a financial intermediary. Please contact your financial advisor to assist you in making your decision. Please refer to the prospectus fee table for more information on the fees and expenses of a particular fund's share classes. In addition to the share classes shown in the chart below, AIM Money Market Fund offers AIM Cash Reserve Shares and AIM Summit Fund offers Class P shares.

AIM Fund Retail Share Classes						
Class A	Class A3	Class B	Class C	Class R	Class Y	Investor Class
<ul style="list-style-type: none"> Initial sales charge which may be waived or reduced Contingent deferred sales charge on certain redemptions 12b-1 fee of 0.25%¹ Generally more appropriate for long-term investors 	<ul style="list-style-type: none"> No initial sales charge No contingent deferred sales charge 12b-1 fee of 0.25% Does not convert to Class A shares Available only for a limited number of funds 	<ul style="list-style-type: none"> No initial sales charge Contingent deferred sales charge on redemptions within six years 12b-1 fee of 1.00% Converts to Class A shares on or about the end of the month which is at least eight years after the date on which shares were purchased along with a pro rata portion of reinvested dividends and distributions² Available only to investors with a total account balance less than \$100,000. The total account value for this purpose includes all accounts eligible for Rights of Accumulation. 	<ul style="list-style-type: none"> No initial sales charge Contingent deferred sales charge on redemptions within one year³ 12b-1 fee of 1.00%⁴ Does not convert to Class A shares Generally more appropriate for short-term investors Purchase orders limited to amounts less than \$1,000,000 	<ul style="list-style-type: none"> No initial sales charge Contingent deferred sales charge on certain redemptions 12b-1 fee of 0.50% Does not convert to Class A shares Generally, available only to employee benefit plans 	<ul style="list-style-type: none"> No initial sales charge No contingent deferred sales charge No 12b-1 fee Does not convert to Class A shares Generally, available only to investors who purchase through fee-based advisory accounts with an approved financial intermediary or to any current, former or retired trustee, director, officer or employee (or immediate family member of a current, former or retired trustee, director, officer or employee) of any AIM Fund or of Invesco Ltd. or any of its subsidiaries. 	<ul style="list-style-type: none"> No initial sales charge No contingent deferred sales charge 12b-1 fee of 0.25%¹ Does not convert to Class A shares Generally closed to new investors

¹ Class A shares of AIM Tax-Free Intermediate Fund and Investor Class shares of AIM Money Market Fund, AIM Tax-Exempt Cash Fund, Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio do not have a 12b-1 fee.

² Class B shares of AIM Money Market Fund convert to AIM Cash Reserve Shares.

³ CDSC does not apply to redemption of Class C shares of AIM LIBOR Alpha Fund or AIM Short Term Bond Fund unless you received Class C shares of AIM LIBOR Alpha Fund or AIM Short Term Bond Fund through an exchange from Class C shares from another AIM Fund that is still subject to a CDSC.

⁴ Class C shares of AIM Floating Rate Fund have a 12b-1 fee of 0.75%.

Important Note: Recently, the Internal Revenue Service (IRS) issued regulations significantly impacting the 403(b) market. The new regulations increased administrative duties and information-sharing responsibilities for both 403(b) plan sponsors and account custodians beginning January 1, 2009. In response to the new IRS regulations and beginning on January 1, 2009, Invesco Aim, on behalf of Invesco National Trust Company (INTC), no longer accepts transfers of assets or contributions to existing 403(b) plan accounts for which INTC serves as custodian ("AIM 403(b) Accounts"). Accordingly, effective January 1, 2009, AIM fund shares of any class are unavailable for purchase by AIM 403(b) Accounts (except in the case of payments on outstanding loans).

We will continue to maintain and service participants' AIM 403(b) Accounts and participants may leave assets invested therein; however, any contributions received after December 31, 2008 will be refused.

Purchases of eligible share classes in respect of non-AIM 403(b) plan accounts for which parties unaffiliated with Invesco Aim serve as custodian will continue to be accepted after December 31, 2008.

SHARE CLASS ELIGIBILITY

Class A, A3, B, C and AIM Cash Reserve Shares

Class A, A3, B, C and AIM Cash Reserve Shares are available to all retail investors, including individuals, trusts, corporations and other business and charitable organizations and eligible employee benefit plans. The share classes offer different fee structures which are intended to compensate financial intermediaries for services provided in connection with the sale of shares and continued maintenance of the customer relationship. You should consider the services provided by your financial advisor and any other intermediaries who will be involved in the servicing of your account when choosing a share class.

Class B shares are not available as an investment for retirement plans maintained pursuant to Section 401 of the Internal Revenue Code (the Code). These plans include 401(k) plans (including AIM Solo 401(k) plans), money purchase pension plans and profit sharing plans. However, plans that have existing accounts invested in Class B shares will continue to be allowed to make additional purchases.

Class P Shares

In addition to the other share classes discussed herein, the AIM Summit Fund offers Class P shares, which were historically sold only through the AIM Summit Investors Plans I and II (each a Plan and, collectively, the Summit Plans). Class P shares are sold with no initial sales charge and have a 12b-1 fee of 0.10%. However, Class P shares are not sold to members of the general public. Only shareholders who had accounts in the Summit Plans at the close of business on December 8, 2006 may purchase Class P shares and only until the total of their combined investments in the Summit Plans and in Class P shares directly equals the face amount of their former Plan under the 30 year extended investment option. The face amount of a Plan is the combined total of all scheduled monthly investments under the Plan. For a Plan with a scheduled monthly investment of \$100.00, the face amount would have been \$36,000.00 under the 30 year extended investment option.

Class R Shares

Class R shares are generally available only to eligible employee benefit plans. These may include, for example, retirement and deferred compensation plans maintained pursuant to Sections 401, 403, and 457 of the Code; nonqualified deferred compensation plans; health savings accounts maintained pursuant to Section 223 of the Code; and voluntary employees' beneficiary arrangements maintained pursuant to Section 501(c)(9) of the Code. Retirement plans maintained pursuant to Section 401 generally include 401(k) plans, profit sharing plans, money purchase pension plans, and defined benefit plans. Class R shares are generally not available for individual retirement accounts (IRAs) such as traditional, Roth, SEP, SAR-SEP and SIMPLE IRAs.

Class Y Shares

Class Y shares are generally available to investors who purchase through a fee-based advisory account with an approved financial intermediary or to any current, former or retired trustee, director, officer or employee (or immediate family members of a current, former or retired trustee, director, officer or employee) of any AIM Fund or of Invesco Ltd. or any of its subsidiaries. In fee-based advisory programs, a financial intermediary typically charges each investor a fee based on the value of the investor's account in exchange for servicing that account.

Investor Class Shares

Some of the funds offer Investor Class shares. Investor Class shares are sold with no initial sales charge and have a maximum 12b-1 fee of 0.25%. Investor Class shares are not sold to members of the general public. Only the following persons may purchase Investor Class shares:

- Investors who established accounts prior to April 1, 2002, in Investor Class shares who have continuously maintained an account in Investor Class shares (this includes anyone listed in the registration of an account, such as a joint owner, trustee or custodian, and immediate family members of such persons). These investors are referred to as "grandfathered investors."
- Customers of certain financial intermediaries which have had relationships with the funds' distributor or any funds that offered Investor Class shares prior to April 1, 2002, who have continuously maintained such relationships. These intermediaries are referred to as "grandfathered intermediaries."
- Eligible employee benefit plan, other than Investor Class shares are generally not available for IRAs, unless the IRA depositor is considered a grandfathered investor or the account is opened through a grandfathered intermediary.
- Any current, former or retired trustee, director, officer or employee (or immediate family member of a current, former or retired trustee, director, officer or employee) of any AIM Fund or of Invesco Ltd. or any of its subsidiaries.

DISTRIBUTION AND SERVICE (12b-1) FEES

Except as noted below, each fund has adopted a distribution plan pursuant to SEC Rule 12b-1. A 12b-1 plan allows a fund to pay distribution fees to Invesco Aim Distributors, Inc. (Invesco Aim Distributors) to compensate or reimburse, as applicable, Invesco Aim Distributors for its efforts in connection with the sale and distribution of the fund's shares and for services provided to shareholders, all or a substantial portion of which are paid to the dealer of record. Because the funds pay these fees out of their assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges.

The following funds and share classes do not have 12b-1 plans:

- AIM Tax-Free Intermediate Fund, Class A shares.
- AIM Money Market Fund, Investor Class shares.
- AIM Tax-Exempt Cash Fund, Investor Class shares.
- Premier Portfolio, Investor Class shares.
- Premier U.S. Government Money Portfolio, Investor Class shares.
- Premier Tax-Exempt Portfolio, Investor Class shares.
- All funds, Class Y shares

INITIAL SALES CHARGES (CLASS A SHARES ONLY)

The funds are grouped into four categories for determining initial sales charges. The “Other Information” section of each fund’s prospectus will tell you the sales charge category in which the fund is classified. As used below, the term “offering price” with respect to all categories of Class A shares includes the initial sales charge.

Category I Initial Sales Charges

Amount invested in a single transaction	Investor's Sales Charge	
	As a % of Offering Price	As a % of Investment
Less than \$ 25,000	5.50%	5.82%
\$ 25,000 but less than \$ 50,000	5.25	5.54
\$ 50,000 but less than \$ 100,000	4.75	4.99
\$100,000 but less than \$ 250,000	3.75	3.90
\$250,000 but less than \$ 500,000	3.00	3.09
\$500,000 but less than \$1,000,000	2.00	2.04

Category II Initial Sales Charges

Amount invested in a single transaction	Investor's Sales Charge	
	As a % of Offering Price	As a % of Investment
Less than \$ 50,000	4.75%	4.99%
\$ 50,000 but less than \$ 100,000	4.00	4.17
\$100,000 but less than \$ 250,000	3.75	3.90
\$250,000 but less than \$ 500,000	2.50	2.56
\$500,000 but less than \$1,000,000	2.00	2.04

Category III Initial Sales Charges

Amount invested in a single transaction	Investor's Sales Charge	
	As a % of Offering Price	As a % of Investment
Less than \$ 100,000	1.00%	1.01%
\$100,000 but less than \$ 250,000	0.75	0.76
\$250,000 but less than \$1,000,000	0.50	0.50

Category IV Initial Sales Charges

Amount invested in a single transaction	Investor's Sales Charge	
	As a % of Offering Price	As a % of Investment
Less than \$ 100,000	2.50%	2.56%
\$100,000 but less than \$ 250,000	2.00	2.04
\$250,000 but less than \$ 500,000	1.50	1.52
\$500,000 but less than \$1,000,000	1.25	1.27

Class A Shares Sold Without an Initial Sales Charge

Certain categories of investors are permitted to purchase and certain intermediaries are permitted to sell Class A shares of the funds without an initial sales charge because their transactions involve little or no expense. The investors who are entitled to purchase Class A shares without paying an initial sales charge include the following:

- Any current, former or retired trustee, director, officer or employee (or immediate family member of a current, former or retired trustee, director, officer or employee) of any AIM Fund or of Invesco Ltd. or any of its subsidiaries. This includes any foundation, trust or eligible employee benefit plan maintained by any of the persons listed above.
- Any registered representative or employee of any intermediary who has an agreement with Invesco Aim Distributors to sell shares of the funds (this includes any immediate family members of such persons).
- Investors who purchase shares through a fee-based advisory account with an approved financial intermediary or any current or retired trustee, director, officer or employee of any AIM Fund or of Invesco Ltd. or any of its subsidiaries. In a fee based advisory program, a financial intermediary typically charges each investor a fee based on the value of the investor’s account in exchange for servicing that account.
- Any investor who purchases their shares with the proceeds of a rollover, transfer or distribution from a retirement plan or individual retirement account for which Invesco Aim Distributors acts as the prototype sponsor to another eligible retirement plan or individual retirement account for which Invesco Aim Distributors acts as the prototype sponsor, to the extent that such proceeds are attributable to the redemption of shares of a fund held through the plan or account.
- Eligible employee benefit plans; provided, however, that they meet at least one of the following requirements:
 - a. the plan has assets of at least \$1 million;
 - b. there are at least 100 employees eligible to participate in the plan; or
 - c. all plan transactions are executed through a single omnibus account per fund.
- Any investor who maintains an account in Investor Class shares of a fund (this includes anyone listed in the registration of an account, such as a joint owner, trustee or custodian, and immediate family members of such persons).
- Qualified Tuition Programs created and maintained in accordance with Section 529 of the Code.

- Insurance company separate accounts.
No investor will pay an initial sales charge in the following circumstances:
- When buying Class A shares of AIM Tax-Exempt Cash Fund and Class A3 shares of AIM Limited Maturity Treasury Fund or AIM Tax-Free Intermediate Fund.
- When reinvesting dividends and distributions.
- When exchanging shares of one fund, that were previously assessed a sales charge, for shares of another fund.
- As a result of a fund's merger, consolidation, or acquisition of the assets of another fund.

Additional information regarding eligibility to purchase shares at reduced or without sales charges is available on the Internet at www.invescoaim.com, then click on the link for My Account, then Service Center, or consult the fund's Statement of Additional Information, which is available on that same website or upon request free of charge.

Reduced Sales Charges and Sales Charge Exceptions

You may qualify for reduced sales charges or sales charge exceptions. To qualify for these reductions or exceptions, you or your financial advisor must notify the transfer agent at the time of purchase that your purchase qualifies for such treatment. Certain individuals and employer-sponsored retirement plans may link accounts for the purpose of qualifying for lower initial sales charges. You or your financial consultant must provide other account numbers to be considered for Rights of Accumulation, or mark the Letter of Intent section on the account application, or provide other relevant documentation, so that the transfer agent can verify your eligibility for the reduction or exception. Please consult the fund's Statement of Additional Information for details.

Purchases of Class A shares of AIM Tax-Exempt Cash Fund, Class A3 shares of AIM Limited Maturity Treasury Fund and AIM Tax-Free Intermediate Fund, AIM Cash Reserve Shares of AIM Money Market Fund and Investor Class shares of any fund will not be taken into account in determining whether a purchase qualifies for a reduction in initial sales charges pursuant to *Rights of Accumulation* or *Letters of Intent*.

Rights of Accumulation

You may combine your new purchases of Class A shares of a fund with other fund shares currently owned (Class A, B, C, P, R or Y) and investments in the AIM College Savings Plan[®] for the purpose of qualifying for the lower initial sales charge rates that apply to larger purchases. The applicable initial sales charge for the new purchase is based on the total of your current purchase and the public offering price of all other shares you own. The transfer agent may automatically link certain accounts registered in the same name with the same taxpayer identification number for the purpose of qualifying you for lower initial sales charge rates. There may be other accounts that are eligible to be linked, as described in the fund's Statement of Additional Information. However, if the accounts are not registered in the same name with the same taxpayer identification number, you will have to contact the transfer agent to request that those accounts be linked. The transfer agent will not be responsible for identifying all accounts that may be eligible to be linked.

Letters of Intent

Under a Letter of Intent (LOI), you commit to purchase a specified dollar amount of Class A shares of one or more funds during a 13-month period. The amount you agree to purchase determines the initial sales charge you pay. If the full amount committed to in the LOI is not invested by the end of the 13-month period, your account will be assessed the higher initial sales charge that would normally be applicable to the amount actually invested.

Reinstatement Following Redemption

If you redeem shares of a fund, you may reinvest all or a portion of the proceeds from the redemption in the same share class of any fund in the same Category within 180 days of the redemption without paying an initial sales charge. Class B, P and Y redemptions may be reinvested only into Class A shares with no initial sales charge.

This reinstatement privilege does not apply to a purchase made through a regularly scheduled automatic investment plan, such as a purchase by a regularly scheduled payroll deduction or transfer from a bank account.

In order to take advantage of this reinstatement privilege, you must inform your financial advisor or the transfer agent that you wish to do so at the time of your investment.

CONTINGENT DEFERRED SALES CHARGES (CDSCs)

CDSCs on Class A Shares and AIM Cash Reserve Shares of AIM Money Market Fund

You can purchase \$1,000,000 or more (a Large Purchase) of Class A shares of Category I, II and IV funds without paying an initial sales charge. However, if you redeem these shares prior to 18 months after the date of purchase, they will be subject to a CDSC of 1%.

If you currently own Class A shares of a Category I, II or IV fund, and make additional purchases without paying an initial sales charge that result in account balances of \$1,000,000 or more, the additional shares purchased will be subject to an 18-month, 1% CDSC.

If Invesco Aim Distributors pays a concession to the dealer of record in connection with a Large Purchase of Class A shares by an employee benefit plan, the Class A shares may be subject to a 1% CDSC if all of the plan's shares are redeemed within one year from the date of the plan's initial purchase.

If you acquire AIM Cash Reserve Shares of AIM Money Market Fund, Class A shares of AIM Tax-Exempt Cash Fund, Class A3 shares of AIM Limited Maturity Treasury Fund or AIM Tax-Free Intermediate Fund through an exchange involving Class A shares that were subject to a CDSC, the shares acquired as a result of the exchange will continue to be subject to that same CDSC.

CDSCs on Class B Shares and on Class C Shares of Funds Other Than AIM LIBOR Alpha Fund and AIM Short Term Bond Fund

Class B and Class C shares are sold without an initial sales charge. However, they are subject to a CDSC. If you redeem your shares during the CDSC period, you will be assessed a CDSC as follows, unless you qualify for one of the CDSC exceptions outlined below:

Year since purchase made:	Class B	Class C
First	5%	1%
Second	4	None
Third	3	None
Fourth	3	None
Fifth	2	None
Sixth	1	None
Seventh and following	None	None

CDSCs on Class C Shares — Employee Benefit Plan

Invesco Aim Distributors pays a concession to the dealer of record in connection with a purchase of Class C shares by an employee benefit plan; the Class C shares are subject to a 1.00% CDSC at the time of redemption if all of the plan's shares are redeemed within one year from the date of the plan's initial purchase.

CDSCs on Class C Shares of AIM LIBOR Alpha Fund and AIM Short Term Bond Fund

Class C shares of AIM LIBOR Alpha Fund and AIM Short Term Bond Fund are not normally subject to a CDSC. However, if you acquired shares of those funds through an exchange, and the shares originally purchased were subject to a CDSC, the shares acquired as a result of the exchange will continue to be subject to that same CDSC. Conversely, if you acquire Class C shares of any other fund as a result of an exchange involving Class C shares of AIM LIBOR Alpha Fund or AIM Short Term Bond Fund that were not subject to a CDSC, then the shares acquired as a result of the exchange will not be subject to a CDSC.

CDSCs on Class R Shares

Class R shares are not normally subject to a CDSC. However, if Invesco Aim Distributors pays a concession to the dealer of record in connection with a purchase of Class R shares by an employee benefit plan, the Class R shares are subject to a 0.75% CDSC at the time of redemption if all of the plan's shares are redeemed within one year from the date of the plan's initial purchase.

Computing a CDSC

The CDSC on redemptions of shares is computed based on the lower of their original purchase price or current net asset value, net of reinvested dividends and capital gains distributions. In determining whether to charge a CDSC, shares are accounted for on a first-in, first-out basis, which means that you will redeem shares on which there is no CDSC first and, then, shares in the order of their purchase.

CDSC Exceptions

Investors who own shares that are otherwise subject to a CDSC will not pay a CDSC in the following circumstances:

- If you participate in the Systematic Redemption Plan and withdraw up to 12% of the value of your shares that are subject to a CDSC in any twelve-month period.
- If you redeem shares to pay account fees.
- If you are the executor, administrator or beneficiary of an estate or are otherwise entitled to assets remaining in an account following the death or post-purchase disability of a shareholder or beneficial owner and you choose to redeem those shares.

There are other circumstances under which you may be able to redeem shares without paying CDSCs. Additional information regarding CDSC exceptions is available on the Internet at www.invescoaim.com, then click on the link for My Account, then Service Center, or consult the fund's Statement of Additional Information, which is available on that same website or upon request free of charge.

Shares acquired through the reinvestment of dividends and distributions are not subject to CDSCs.

The following share classes are sold with no CDSC:

- Class A shares of any Category III Fund.
- Class A shares of AIM Tax-Exempt Cash Fund.
- Class A3 shares of AIM Limited Maturity Treasury Fund and AIM Tax-Free Intermediate Fund.
- AIM Cash Reserve Shares of AIM Money Market Fund.
- Investor Class shares of any fund.
- Class P shares of AIM Summit Fund.
- Class Y shares of any fund.

CDSCs Upon Converting to Class Y Shares

If shares that are subject to a CDSC are converted to Class Y shares, the applicable CDSC will be assessed prior to conversion.

REDEMPTION FEES

Certain funds impose a 2% redemption fee (on redemption proceeds) if you redeem or exchange shares within 31 days of purchase. Please refer to the applicable fund's prospectus to determine whether that fund imposes a redemption fee. As of the date of this prospectus, the following funds impose redemption fees:

AIM Asia Pacific Growth Fund	AIM Global Core Equity Fund	AIM Gold & Precious Metals Fund	AIM International Total Return Fund
AIM China Fund	AIM Global Equity Fund	AIM High Yield Fund	AIM Japan Fund
AIM Developing Markets Fund	AIM Global Growth Fund	AIM International Allocation Fund	AIM Trimark Fund
AIM European Growth Fund	AIM Global Health Care Fund	AIM International Core Equity Fund	
AIM European Small Company Fund	AIM Global Real Estate Fund	AIM International Growth Fund	
AIM Floating Rate Fund	AIM Global Small & Mid Cap Growth Fund	AIM International Small Company Fund	

The redemption fee will be retained by the fund from which you are redeeming or exchanging shares, and is intended to offset the trading costs, market impact and other costs associated with short-term money movements in and out of the fund. The redemption fee is imposed on a first-in, first-out basis, which means that you will redeem shares in the order of their purchase.

Redemption fees generally will not be charged in the following circumstances:

- Redemptions and exchanges of shares held in accounts maintained by intermediaries that do not have the systematic capability to assess the redemption fees.
- Redemptions and exchanges of shares held by funds of funds, qualified tuition plans maintained pursuant to Section 529 of the Code, variable insurance contracts or separately managed qualified default investment alternative vehicles maintained pursuant to Section 404(c)(5) of the Employee Retirement Income Security Act of 1974, as amended (ERISA), which use the funds as underlying investments.
- Redemptions and exchanges effectuated pursuant to automatic investment rebalancing or dollar cost averaging programs or systematic withdrawal plans.
- Redemptions requested within 31 days following the death or post-purchase disability of an account owner.
- Redemptions or exchanges initiated by a fund.

The following shares are not subject to redemption fees, irrespective of whether they are redeemed in accordance with any of the exceptions set forth above:

- Shares acquired through the reinvestment of dividends and distributions.
- Shares acquired through systematic purchase plans.
- Shares acquired in connection with a rollover or transfer of assets from the trustee or custodian of an employee benefit plan to the trustee or custodian of another employee benefit plan.

Shares held by employee benefit plans will only be subject to redemption fees if the shares were acquired by exchange and are redeemed by exchange within 31 days of purchase.

Some investments in the funds are made through accounts that are maintained by intermediaries (rather than the funds' transfer agent) and some investments are made indirectly through products that use the funds as underlying investments, such as employee benefit plans, funds of funds, qualified tuition plans, and variable insurance contracts (these products are generally referred to as conduit investment vehicles). If shares of the funds are held in an account maintained by an intermediary or in the name of a conduit investment vehicle (and not in the names of individual investors), the intermediary account or conduit investment vehicle may be considered an individual shareholder of the funds for purposes of assessing redemption fees. In these cases, the funds are likely to be limited in their ability to assess redemption fees on transactions initiated by individual investors, and the applicability of redemption fees will be determined based on the aggregate holdings and redemptions of the intermediary account or the conduit investment vehicle.

If shares of the funds are held in an account maintained by an intermediary or in the name of a conduit investment vehicle (and not in the names of individual investors), the intermediary or conduit investment vehicle may impose rules intended to limit short-term money movements in and out of the funds which differ from those described in this prospectus. In such cases, there may be redemption fees imposed by the intermediary or conduit investment vehicle on different terms (and subject to different exceptions) than those set forth above. Please consult your financial advisor or other intermediary for details.

The funds have the discretion to waive the 2% redemption fee if a fund is in jeopardy of losing its registered investment company qualification for tax purposes.

Your financial advisor or other intermediary may charge service fees for handling redemption transactions. Your shares also may be subject to a CDSC in addition to the redemption fee.

PURCHASING SHARES

If you hold your shares through a financial advisor or other intermediary, your eligibility to purchase shares and the terms by which you may purchase, redeem and exchange shares may differ depending on that institution's policies.

Minimum Investments

There are no minimum investments for Class P or R shares for fund accounts. The minimum investments for Class A, A3, B, C, Y and Investor Class shares for fund accounts are as follows:

Type of Account	Initial Investment Per Fund	Additional Investments Per Fund
Asset or fee-based accounts managed by your financial advisor	None	None
Eligible employee benefit plans, SEP, SARSEP and SIMPLE IRA plans	None	None
IRAs, Roth IRAs and Coverdell ESAs accounts if the new investor is purchasing shares through a systematic purchase plan	\$ 25	\$25
All other accounts if the investor is purchasing shares through a systematic purchase plan	50	50
IRAs, Roth IRAs and Coverdell ESAs	250	25
All other accounts	1,000	50

Invesco Aim Distributors has the discretion to accept orders for lesser amounts.

How to Purchase Shares

	Opening An Account	Adding To An Account
Through a Financial Advisor	Contact your financial advisor.	Contact your financial advisor.
By Mail	Mail completed account application and check to the transfer agent, Invesco Aim Investment Services, Inc., P.O. Box 4739, Houston, TX 77210-4739. Invesco Aim does NOT accept the following types of payments: Credit Card Checks, Third Party Checks, and Cash*.	Mail your check and the remittance slip from your confirmation statement to the transfer agent. Invesco Aim does NOT accept the following types of payments: Credit Card Checks, Third Party Checks, and Cash*.
By Wire	Mail completed account application to the transfer agent. Call the transfer agent at (800) 959-4246 to receive a reference number. Then, use the wire instructions provided below.	Call the transfer agent to receive a reference number. Then, use the wire instructions provided below.
Wire Instructions	Beneficiary Bank ABA/Routing #: 021000021 Beneficiary Account Number: 00100366807 Beneficiary Account Name: Invesco Aim Investment Services, Inc. RFB: Fund Name, Reference # OBI: Your Name, Account #	
By Telephone	Open your account using one of the methods described above.	Select the Bank Account Information option on your completed account application or complete a Systematic Options and Bank Information Form. Mail the application or form to the transfer agent. Once the transfer agent has received the form, call the transfer agent at the number below to place your purchase order.
Automated Investor Line	Open your account using one of the methods described above.	Call the Invesco Aim 24-hour Automated Investor Line at 1-800-246-5463. You may place your order after you have provided the bank instructions that will be requested.
By Internet	Open your account using one of the methods described above.	Access your account at www.invescoaim.com . The proper bank instructions must have been provided on your account. You may not purchase shares in retirement accounts on the internet.

* In addition, Invesco Aim does not accept cash equivalents for employer sponsored plan accounts. Cash equivalents include cashier's checks, official checks, bank drafts, traveler's checks, treasurer's checks, postal money orders or money orders. We also reserve the right to reject at our sole discretion payment by Temporary / Starter Checks.

Purchase orders will not be processed unless the account application and purchase payment are received in good order. In accordance with the USA PATRIOT Act, if you fail to provide all the required information requested in the current account application, your purchase order will not be processed. Additionally, federal law requires that the fund verify and record your identifying information.

Systematic Purchase Plan

You can arrange for periodic investments in any of the funds by authorizing the transfer agent to withdraw the amount of your investment from your bank account on a day or dates you specify and in an amount of at least \$25 per fund for IRAs, Roth IRAs and Coverdell ESAs, and at least \$50 per fund for all other types of accounts. You may stop the Systematic Purchase Plan at any time by giving the transfer agent notice ten days prior to your next scheduled withdrawal. Certain financial advisors and other intermediaries may also offer systematic purchase plans.

Dollar Cost Averaging

Dollar Cost Averaging allows you to make automatic periodic exchanges, if permitted, from one fund to another fund or multiple other funds. The account from which exchanges are to be made must have a minimum balance of \$5,000 before you can use this option. Exchanges will occur on (or about) the day of the month you specify, in the amount you specify. Dollar Cost Averaging cannot be set up for the 29th through the 31st of the month. The minimum amount you can exchange to another fund is \$50. Certain financial advisors and other intermediaries may also offer dollar cost averaging programs. If you participate in one of these programs and it is the same or similar to Invesco Aim's Dollar Cost Averaging program, exchanges made under the program generally will not be counted toward the limitation of four exchanges out of a fund per calendar year, discussed below.

Automatic Dividend and Distribution Investment

Your dividends and distributions may be paid in cash or reinvested in the same fund or another fund without paying an initial sales charge. Unless you specify otherwise, your dividends and distributions will automatically be reinvested in the same fund. If you elect to receive your distributions by check,

and the distribution amount is \$10 or less, then the amount will be automatically reinvested in the same fund and no check will be issued. If you have elected to receive distributions by check, and the postal service is unable to deliver checks to your address of record, then your distribution election may be converted to having all subsequent distributions reinvested in the same fund and no checks will be issued. You should contact the transfer agent to change your distribution option, and your request to do so must be received by the transfer agent before the record date for a distribution in order to be effective for that distribution. No interest will accrue on amounts represented by uncashed distribution checks.

You must comply with the following requirements to be eligible to invest your dividends and distributions in shares of another fund:

- Your account balance in the fund paying the dividend or distribution must be at least \$5,000; and
- Your account balance in the fund receiving the dividend or distribution must be at least \$500.

Portfolio Rebalancing Program

If you have at least \$5,000 in your account, you may participate in the Portfolio Rebalancing Program. Under this Program, you can designate how the total value of your fund holdings should be rebalanced, on a percentage basis, between two and ten of your funds on a quarterly, semiannual or annual basis. Your portfolio will be rebalanced through the exchange of shares in one or more of your funds for shares of the same class of one or more other funds in your portfolio. Rebalancing will not occur if your portfolio is within 2% of your stated allocation. If you wish to participate in the Program, make changes or cancel the Program, the transfer agent must receive your request to participate, changes, or cancellation in good order at least five business days prior to the next rebalancing date, which is normally the 28th day of the last month of the period you choose. We may modify, suspend or terminate the Program at any time on 60 days' prior written notice to participating investors. Certain financial advisors and other intermediaries may also offer portfolio rebalancing programs. If you participate in one of these programs and it is the same as or similar to Invesco Aim's program, exchanges made under the program generally will not be counted toward the limitation of four exchanges out of a fund per calendar year, discussed below.

Retirement Plans Sponsored by Invesco Aim Distributors

Invesco Aim Distributors acts as the prototype sponsor for certain types of retirement plan documents. These plan documents are generally available to anyone wishing to invest plan assets in the funds. These documents are provided subject to terms, conditions and fees that vary by plan type. Contact your financial advisor or other intermediary for details.

REDEEMING SHARES

For funds other than Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio, the transfer agent must receive your call during the hours of the customary trading session of the New York Stock Exchange (NYSE) in order to effect the redemption at that day's net asset value. For Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio, the transfer agent must receive your call before the last net asset value determination in order to effect the redemption that day.

How to Redeem Shares

Through a Financial Advisor or Other Intermediary	Contact your financial advisor or intermediary (including your retirement plan administrator).
By Mail	<p>Send a written request to the transfer agent which includes:</p> <ul style="list-style-type: none"> • Original signatures of all registered owners/trustees; • The dollar value or number of shares that you wish to redeem; • The name of the fund(s) and your account number; and • Signature guarantees, if necessary (see below). <p>The transfer agent may require that you provide additional documentation, or information, such as corporate resolutions or powers of attorney, if applicable. If you are redeeming from an IRA or other type of retirement account, you must complete the appropriate distribution form, as well as employer authorization.</p>
By Telephone	<p>Call the transfer agent at 1-800-959-4246. You will be allowed to redeem by telephone if:</p> <ul style="list-style-type: none"> • Your redemption proceeds are to be mailed to your address on record (and there has been no change in your address of record within the last 30 days) or transferred electronically to a pre-authorized checking account; • You do not hold physical share certificates; • You can provide proper identification information; • Your redemption proceeds do not exceed \$250,000 per fund; and • You have not previously declined the telephone redemption privilege. <p>You may, in limited circumstances, initiate a redemption from an Invesco Aim IRA account by telephone. Redemptions from other types of retirement plan accounts may be initiated only in writing and require the completion of the appropriate distribution form, as well as employer authorization.</p>
Automated Investor Line	Call the Invesco Aim 24-hour Automated Investor Line at 1-800-246-5463. You may place your redemption order after you have provided the bank instructions that will be requested.
By Internet	<p>Place your redemption request at www.invescoaim.com. You will be allowed to redeem by Internet if:</p> <ul style="list-style-type: none"> • You do not hold physical share certificates; • You can provide proper identification information; • Your redemption proceeds do not exceed \$250,000 per fund; and • You have already provided proper bank information. <p>Redemptions from most retirement plan accounts may be initiated only in writing and require the completion of the appropriate distribution form, as well as employer authorization.</p>

Timing and Method of Payment

We normally will send out payments within one business day, and in any event no more than seven days, after your redemption request is received in good order (meaning that all necessary information and documentation related to the redemption request have been provided to the transfer agent). If you redeem shares recently purchased by check or ACH, you may be required to wait up to ten business days before we send your redemption proceeds. This delay is necessary to ensure that the purchase has cleared. Payment may be postponed in cases where the SEC declares an emergency or normal trading is halted on the NYSE.

Redemption checks are mailed to your address of record, via first class U.S. mail, unless you make other arrangements with the transfer agent.

We use reasonable procedures to confirm that instructions communicated via telephone and the Internet are genuine, and we are not liable for losses arising from actions taken in accordance with instructions that are reasonably believed to be genuine.

Expedited Redemptions (AIM Cash Reserve Shares of AIM Money Market Fund only)

If you place your redemption order by telephone, before 11:30 a.m. Eastern Time and request an expedited redemption, we will transmit payment of redemption proceeds on that same day via federal wire to a bank of record on your account. If we receive your redemption order after 11:30 a.m. Eastern Time and before the close of the customary trading session of the NYSE, we will transmit payment on the next business day.

Systematic Withdrawals

You may arrange for regular periodic withdrawals from your account in amounts equal to or greater than \$50 per fund. We will redeem the appropriate number of shares from your account to provide redemption proceeds in the amount requested. You must have a total account balance of at least \$5,000 in order to establish a Systematic Redemption Plan, unless you are establishing a Required Minimum Distribution for a retirement plan. You can stop this plan at any time by giving ten days prior notice to the transfer agent.

Check Writing

The transfer agent provides check writing privileges for accounts in the following funds and share classes:

- AIM Money Market Fund, AIM Cash Reserve Shares, Class Y shares and Investor Class shares
- AIM Tax-Exempt Cash Fund, Class A shares, Class Y shares and Investor Class shares
- Premier Portfolio, Investor Class shares
- Premier Tax-Exempt Portfolio, Investor Class shares
- Premier U.S. Government Money Portfolio, Investor Class shares

You may redeem shares of these funds by writing checks in amounts of \$250 or more if you have completed an authorization form. Redemption by check is not available for retirement accounts. Checks are not eligible to be converted to ACH by the payee. You may not give authorization to a payee by phone to debit your account by ACH for a debt owed to the payee.

Signature Guarantees

We require a signature guarantee in the following circumstances:

- When your redemption proceeds will equal or exceed \$250,000 per fund.
- When you request that redemption proceeds be paid to someone other than the registered owner of the account.
- When you request that redemption proceeds be sent somewhere other than the address of record or bank of record on the account.
- When you request that redemption proceeds be sent to a new address or an address that changed in the last 30 days.

The transfer agent will accept a guarantee of your signature by a number of different types of financial institutions. Call the transfer agent for additional information. Some institutions have transaction amount maximums for these guarantees. Please check with the guarantor institution to determine whether the signature guarantee offered will be sufficient to cover the value of your transaction request.

Redemptions in Kind

Although the funds generally intend to pay redemption proceeds solely in cash, the funds reserve the right to determine, in their sole discretion, whether to satisfy redemption requests by making payment in securities or other property (known as a redemption in kind).

Redemptions Initiated by the Funds

If your account (Class A, A3, B, C, P and Investor Class shares only) has been open at least one year, you have not made an additional purchase in the account during the past six calendar months, and the value of your account falls below \$500 for three consecutive months, the funds have the right to redeem the account after giving you 60 days' prior written notice. You may avoid having your account redeemed during the notice period by bringing the account value up to \$500 or by initiating a Systematic Purchase Plan.

If the fund determines that you have not provided a correct Social Security or other tax identification number on your account application, or the fund is not able to verify your identity as required by law, the fund may, at its discretion, redeem the account and distribute the proceeds to you.

EXCHANGING SHARES

You may, under certain circumstances, exchange shares in one fund for those of another fund. An exchange is the purchase of shares in one fund which

is paid for with the proceeds from a redemption of shares of another fund effectuated on the same day. Accordingly, the procedures and processes applicable to redemptions of fund shares, as discussed under the heading “Redeeming Shares” above, will apply. Before requesting an exchange, review the prospectus of the fund you wish to acquire.

All exchanges are subject to the limitations set forth in the prospectuses of the funds. If you wish to exchange shares of one fund for those of another fund, you must consult the prospectus of the fund whose shares you wish to acquire to determine whether the fund is offering shares to new investors and whether you are eligible to acquire shares of that fund.

Permitted Exchanges

Except as otherwise provided below under “Exchanges Not Permitted”, you generally may exchange your shares for shares of the same class of another fund. The following below shows permitted exchanges:

Exchange From	Exchange To
AIM Cash Reserve Shares	Class A, A3, B, C, R, Y*, Investor Class
Class A	Class A, A3, Y*, Investor Class, AIM Cash Reserve Shares
Class A3	Class A, A3, Y*, Investor Class, AIM Cash Reserve Shares
Investor Class	Class A, A3, Y*, Investor Class
Class P	Class A, A3, AIM Cash Reserve Shares
Class B	Class B
Class C	Class C, Y*
Class R	Class R
Class Y	Class Y

*You may exchange your AIM Cash Reserve Shares, Class A shares, Class A3 shares, Class C shares or Investor Class shares for Class Y shares of the same fund if you otherwise qualify to buy that fund’s Class Y shares. Please consult your financial advisor to discuss the tax implications, if any, of all exchanges into Class Y shares of the same fund.

Exchanges Not Permitted

The following exchanges are not permitted:

- Investor Class shares cannot be exchanged for Class A shares of any fund which offers Investor Class shares.
- Exchanges into Class A shares of AIM Limited Maturity Treasury Fund and AIM Tax-Free Intermediate Fund (also known as the Category III funds) are not permitted.
- Class A shares of AIM Limited Maturity Treasury Fund and AIM Tax-Free Intermediate Fund cannot be exchanged for Class A3 shares of those funds.
- AIM Cash Reserve Shares cannot be exchanged for Class B, C or R shares if the shares being exchanged were acquired by exchange from Class A shares of any fund.
- AIM Cash Reserve shares, Class A shares, Class A3 shares, Class C shares or Investor Class shares of one fund can not be exchanged for Class Y shares of a different fund.
- All existing systematic exchanges and reallocations will cease and these options will no longer be available on all 403(b) prototype plans.

Exchange Conditions

The following conditions apply to all exchanges:

- Shares must have been held for at least one day prior to the exchange with the exception of dividends and distributions that are reinvested; and
- If you have physical share certificates, you must return them to the transfer agent in order to effect the exchange.

Under unusual market conditions, a fund may delay the exchange of shares for up to five business days if it determines that it would be materially disadvantaged by the immediate transfer of exchange proceeds. The exchange privilege is not an option or right to purchase shares. Any of the participating funds or the distributor may modify or terminate this privilege at any time.

Limit on the Number of Exchanges

You will generally be limited to four exchanges out of a fund per calendar year (other than the money market funds); provided, however, that the following transactions will not count toward the exchange limitation:

- Exchanges of shares held in accounts maintained by intermediaries that do not have the systematic capability to apply the exchange limitation.
- Exchanges of shares held by funds of funds, qualified tuition plans maintained pursuant to Section 529 of the Code, and insurance company separate accounts which use the funds as underlying investments.
- Generally, exchanges effectuated pursuant to automatic investment rebalancing or dollar cost averaging programs.
- Exchanges initiated by a fund or by the trustee, administrator or other fiduciary of an employee benefit plan (not in response to distribution or exchange instructions received from a plan participant).

Each fund reserves the discretion to accept exchanges in excess of these guidelines on a case-by-case basis if the fund, or its designated agent, believes that granting such exceptions would be consistent with the best interests of shareholders.

There is no limit on the number of exchanges out of AIM Limited Maturity Treasury Fund, AIM Money Market Fund, AIM Tax-Exempt Cash Fund, Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio.

If you exchange shares of one fund for shares of multiple other funds as part of a single transaction, that transaction is counted as one exchange out of a fund.

Initial Sales Charges and CDSCs Applicable to Exchanges

You may be required to pay an initial sales charge when exchanging from a fund with a lower initial sales charge than the one into which you are exchanging. If you exchange into shares that are subject to a CDSC, we will begin the holding period for purposes of calculating the CDSC on the date you made your initial purchase.

RIGHTS RESERVED BY THE FUNDS

Each fund and its agents reserve the right at any time to:

- Reject or cancel all or any part of any purchase or exchange order.
- Modify any terms or conditions related to the purchase, redemption or exchange of shares of any fund.
- Reject or cancel any request to establish a Systematic Purchase Plan, Systematic Redemption Plan or Portfolio Rebalancing Program.
- Suspend, change or withdraw all or any part of the offering made by this prospectus.

PRICING OF SHARES

Determination of Net Asset Value

The price of each fund's shares is the fund's net asset value per share. The funds value portfolio securities for which market quotations are readily available at market value. The funds value all other securities and assets for which market quotations are unavailable or unreliable at their fair value in good faith using procedures approved by the Boards of Trustees of the funds (collectively, the Board). The Board has delegated the daily determination of good faith fair value methodologies to Invesco Aim's Valuation Committee, which acts in accordance with Board approved policies. On a quarterly basis, Invesco Aim provides the Board various reports indicating the quality and effectiveness of its fair value decisions on portfolio holdings. Securities and other assets quoted in foreign currencies are valued in U.S. dollars based on the prevailing exchange rates on that day.

Even when market quotations are available, they may be stale or unreliable because the security is not traded frequently, trading on the security ceased before the close of the trading market or issuer specific events occurred after the security ceased trading or because of the passage of time between the close of the market on which the security trades and the close of the NYSE and when the fund calculates its net asset value. Issuer specific events may cause the last market quotation to be unreliable. Such events may include a merger or insolvency, events which affect a geographical area or an industry segment, such as political events or natural disasters, or market events, such as a significant movement in the U.S. market. Where market quotations are not readily available, including where Invesco Aim determines that the closing price of the security is unreliable, Invesco Aim will value the security at fair value in good faith using procedures approved by the Board. Fair value pricing may reduce the ability of frequent traders to take advantage of arbitrage opportunities resulting from potentially "stale" prices of portfolio holdings. However, it cannot eliminate the possibility of frequent trading.

Fair value is that amount that the owner might reasonably expect to receive for the security upon its current sale. Fair value requires consideration of all appropriate factors, including indications of fair value available from pricing services. A fair value price is an estimated price and may vary from the prices used by other mutual funds to calculate their net asset values.

Invesco Aim may use indications of fair value from pricing services approved by the Board. In other circumstances, the Invesco Aim Valuation Committee may fair value securities in good faith using procedures approved by the Board. As a means of evaluating its fair value process, Invesco Aim routinely compares closing market prices, the next day's opening prices for the security in its primary market if available, and indications of fair value from other sources. Fair value pricing methods and pricing services can change from time to time as approved by the Board.

Specific types of securities are valued as follows:

Senior Secured Floating Rate Loans and Senior Secured Floating Rate Debt Securities. Senior secured floating rate loans and senior secured floating rate debt securities are fair valued using evaluated quotes provided by an independent pricing service. Evaluated quotes provided by the pricing service may reflect appropriate factors such as market quotes, ratings, tranche type, industry, company performance, spread, individual trading characteristics, institution-size trading in similar groups of securities and other market data.

Domestic Exchange Traded Equity Securities. Market quotations are generally available and reliable for domestic exchange traded equity securities. If market quotations are not available or are unreliable, Invesco Aim will value the security at fair value in good faith using procedures approved by the Board.

Foreign Securities. If market quotations are available and reliable for foreign exchange traded equity securities, the securities will be valued at the market quotations. Because trading hours for certain foreign securities end before the close of the NYSE, closing market quotations may become unreliable. If between the time trading ends on a particular security and the close of the customary trading session on the NYSE events occur that are significant and may make the closing price unreliable, the fund may fair value the security. If an issuer specific event has occurred that Invesco Aim determines, in its judgment, is likely to have affected the closing price of a foreign security, it will price the security at fair value. Invesco Aim also relies on a screening process from a pricing vendor to indicate the degree of certainty, based on historical data, that the closing price in the principal market where a foreign security trades is not the current market value as of the close of the NYSE. For foreign securities where Invesco Aim believes, at the approved degree of certainty, that the price is not reflective of current market value, Invesco Aim will use the indication of fair value from the pricing service to determine the fair value of the security. The pricing vendor, pricing methodology or degree of certainty may change from time to time.

Fund securities primarily traded on foreign markets may trade on days that are not business days of the fund. Because the net asset value of fund shares is determined only on business days of the fund, the value of the portfolio securities of a fund that invests in foreign securities may change on days when you will not be able to purchase or redeem shares of the fund.

Fixed Income Securities. Government, corporate, asset-backed and municipal bonds, convertible securities, including high yield or junk bonds, and loans, normally are valued on the basis of prices provided by independent pricing services. Prices provided by the pricing services may be determined without exclusive reliance on quoted prices, and may reflect appropriate factors such as institution-size trading in similar groups of securities, developments related to special securities, dividend rate, maturity and other market data. Prices received from pricing services are fair value prices. In addition, if the price provided by the pricing service and independent quoted prices are unreliable, the Invesco Aim valuation committee will fair value the security using procedures approved by the Board.

Short-term Securities. The funds' short-term investments are valued at amortized cost when the security has 60 days or less to maturity. AIM Money Market Fund, AIM Tax-Exempt Cash Fund, Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio value all their securities at amortized cost. AIM High Income Municipal Fund, AIM Municipal Bond Fund and AIM Tax-Free Intermediate Fund value variable rate securities that have an unconditional demand or put feature exercisable within seven days or less at par, which reflects the market value of such securities.

Futures and Options. Futures contracts are valued at the final settlement price set by the exchange on which they are principally traded. Options are valued on the basis of market quotations, if available.

Swap Agreements. Swap Agreements are fair valued using an evaluated quote provided by an independent pricing service. Evaluated quotes provided by the pricing service are based on a model that may include end of day net present values, spreads, ratings, industry and company performance.

Open-end Funds. To the extent a fund invests in other open-end funds, other than open-end funds that are exchange traded, the investing fund will calculate its net asset value using the net asset value of the underlying fund in which it invests.

Each fund determines the net asset value of its shares on each day the NYSE is open for business (a business day), as of the close of the customary trading session, or earlier NYSE closing time that day. AIM Money Market Fund also determines its net asset value as of 12:00 noon Eastern Time on each business day. Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio determine the net asset value of their shares every fifteen minutes on each business day, beginning at 8:00 a.m. Eastern Time. The last net asset value determination on any business day for Premier Portfolio and Premier U.S. Government Money Portfolio will generally occur at 5:30 p.m. Eastern Time, and the last net asset value determination on any business day for Premier Tax-Exempt Portfolio will generally occur at 4:30 p.m. Eastern Time. Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio are authorized not to open for trading on a day that is otherwise a business day if the Federal Reserve Bank of New York and the Bank of New York, the fund's custodian, are not open for business or the Securities Industry and Financial Markets Association (SIFMA) recommends that government securities dealers not open for trading and any such day will not be considered a business day. Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio also may close early on a business day if SIFMA recommends that government securities dealers close early. If Premier Portfolio, Premier Tax-Exempt Portfolio or Premier U.S. Government Money Portfolio uses its discretion to close early on a business day, the last net asset value calculation will occur as of the time of such closing.

From time to time and in circumstances deemed appropriate by Invesco Aim in its sole discretion, each of Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio may remain open for business, during customary business day hours, on a day that the NYSE is closed for business. In such event, on such day you will be permitted to purchase or redeem shares of such funds and net asset values will be calculated for such funds.

Timing of Orders

For funds other than Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio, you can purchase or redeem shares on each business day prior to the close of the customary trading session or any earlier NYSE closing time that day. For funds other than Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio, purchase orders that are received and accepted before the close of the customary trading session or any earlier NYSE closing time on a business day generally are processed that day and settled on the next business day.

For Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio, you can purchase or redeem shares on each business day, prior to the last net asset value determination on such business day; however, if your order is received and accepted after the close of the customary trading session or any earlier NYSE closing time that day, your order generally will be processed on the next business day and settled on the second business day following the receipt and acceptance of your order.

For all funds, you can exchange shares on each business day, prior to the close of the customary trading session or any earlier NYSE closing time that day. Shareholders of Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio therefore cannot exchange their shares after the close of the customary trading session or any earlier NYSE closing time on a particular day, even though these funds remain open after such closing time.

The funds price purchase, exchange and redemption orders at the net asset value calculated after the transfer agent receives an order in good order. Any applicable sales charges are applied at the time an order is processed. A fund may postpone the right of redemption only under unusual circumstances, as allowed by the Securities and Exchange Commission, such as when the NYSE restricts or suspends trading.

TAXES

In general, if you are a taxable investor, dividends and distributions you receive are taxable as ordinary income or long-term capital gains for federal income tax purposes. This is true whether you reinvest distributions in additional fund shares or take them in cash. Every year, you will be sent information showing the amount of dividends and distributions you received from each fund during the prior year. Investors should read the information under the heading “Other Information—Special Tax Information Regarding the Fund” where applicable in the fund’s prospectus. In addition, investors in taxable accounts should be aware of the following basic tax points:

- Distributions of net short-term capital gains are taxable to you as ordinary income. A fund that is expected to have higher turnover than that of other funds is more likely to generate short-term gain or loss.
- Distributions of net long-term capital gains are taxable to you as long-term capital gains no matter how long you have owned your fund shares.
- If you are an individual and meet certain holding period requirements, a portion of income dividends paid to you by a fund may be designated as qualified dividend income eligible for taxation at long-term capital gain rates. These reduced rates generally are available with respect to taxable years of a fund beginning before January 1, 2011, unless such provision is extended or made permanent, for dividends derived from a fund’s investment in stocks of domestic corporations and qualified foreign corporations. In the case of a fund that invests primarily in debt securities, either none or only a nominal portion of the dividends paid by the fund will be eligible for taxation at these reduced rates.
- Distributions declared to shareholders with a record date in December—if paid to you by the end of January—are taxable for federal income tax purposes as if received in December.
- Any long-term or short-term capital gains realized from redemptions of fund shares will be subject to federal income tax. For tax purposes, an exchange of your shares for shares of another fund is the same as a sale.
- If you invest in a fund shortly before it makes a capital gains distribution, the distribution will lower the value of the fund’s shares by the amount of the distribution and, in effect, you will receive some of your investment back in the form of a taxable distribution. This is sometimes referred to as “buying a dividend.”
- By law, if you do not provide a fund with your proper taxpayer identification number and certain required certifications, you may be subject to backup withholding on any distributions of income, capital gains, or proceeds from the sale of your shares. A fund also must withhold if the IRS instructs it to do so. When withholding is required, the amount will be 28% of any distributions or proceeds paid.
- You will not be required to include the portion of dividends paid by the fund derived from interest on federal obligations in your gross income for purposes of personal and, in some cases, corporate income taxes in many state and local tax jurisdictions. The percentage of dividends that constitutes dividends derived from interest on federal obligations will be determined annually. This percentage may differ from the actual percentage of interest received by the fund on federal obligations for the particular days on which you hold shares.
- Fund distributions and gains from sale or exchange of your fund shares generally are subject to state and local income taxes.
- If a fund qualifies to pass through to you the tax benefits from foreign taxes it pays on its investments, and elects to do so, then any foreign taxes it pays on these investments may be passed through to you as a foreign tax credit. You will then be required to include your pro-rata share of these taxes in gross income, even though not actually received by you, and will be entitled either to deduct your share of these taxes in computing your taxable income, or to claim a foreign tax credit for these taxes against your U.S. federal income tax.
- Foreign investors should be aware that U.S. withholding, special certification requirements to avoid U.S. backup withholding and claim any treaty benefits and estate taxes may apply to an investment in a fund.

The preceding discussion concerning the taxability of fund dividends and distributions and of redemptions and exchanges of fund shares is inapplicable to investors that are generally exempt from federal income tax, such as retirement plans that are qualified under Section 401, 403, 408, 408A and 457 of the Code, individual retirement accounts (IRAs) and Roth IRAs. You should consult your tax advisor before investing in a fund.

PAYMENTS TO FINANCIAL ADVISORS

The financial advisor or intermediary through which you purchase your shares may receive all or a portion of the sales charges and distribution fees discussed above. In addition to those payments, Invesco Aim Distributors or one or more of its corporate affiliates (collectively, Invesco Aim Affiliates) may make additional cash payments to financial advisors in connection with the promotion and sale of shares of the funds. These additional cash payments may include cash payments and other payments for certain marketing and support services. Invesco Aim Affiliates make these payments from their own resources, from Invesco Aim Distributors’ retention of initial sales charges and from payments to Invesco Aim Distributors made by the funds under their 12b-1 plans. In this context, “financial advisors” include any broker, dealer, bank (including bank trust departments), registered investment advisor, financial planner, retirement plan administrator and any other financial intermediary having a selling, administration or similar agreement with Invesco Aim Affiliates.

Invesco Aim Affiliates make payments as incentives to certain financial advisors to promote and sell shares of the funds. The benefits Invesco Aim Affiliates receive when they make these payments include, among other things, placing the funds on the financial advisor’s funds sales system, and access (in some cases on a preferential basis over other competitors) to individual members of the financial advisor’s sales force or to the financial advisor’s management. These payments are sometimes referred to as “shelf space” payments because the payments compensate the financial advisor for including the funds in its fund sales system (on its “sales shelf”). Invesco Aim Affiliates compensate financial advisors differently depending typically

on the level and/or type of considerations provided by the financial advisor. The payments Invesco Aim Affiliates make may be calculated based on sales of shares of the funds (Sales-Based Payments), in which case the total amount of such payments shall not exceed 0.25% of the public offering price of all shares sold by the financial advisor during the particular period. Payments may also be calculated based on the average daily net assets of the applicable funds attributable to that particular financial advisor (Asset-Based Payments), in which case the total amount of such cash payments shall not exceed 0.25% per annum of those assets during a defined period. Sales-Based Payments primarily create incentives to make new sales of shares of the funds and Asset-Based Payments primarily create incentives to retain previously sold shares of the funds in investor accounts. Invesco Aim Affiliates may pay a financial advisor either or both Sales-Based Payments and Asset-Based Payments.

Invesco Aim Affiliates are motivated to make these payments as they promote the sale of fund shares and the retention of those investments by clients of financial advisors. To the extent financial advisors sell more shares of the funds or retain shares of the funds in their clients' accounts, Invesco Aim Affiliates benefit from the incremental management and other fees paid to Invesco Aim Affiliates by the funds with respect to those assets.

Invesco Aim Affiliates also may make payments to certain financial advisors for certain administrative services, including record keeping and sub-accounting of shareholder accounts pursuant to a sub-transfer agency, omnibus account service or sub-accounting agreement. All fees payable by Invesco Aim Affiliates under this category of services are charged back to the funds, subject to certain limitations approved by the Board.

You can find further details in the fund's Statement of Additional Information about these payments and the services provided by financial advisors. In certain cases these payments could be significant to the financial advisor. Your financial advisor may charge you additional fees or commissions other than those disclosed in this prospectus. You can ask your financial advisor about any payments it receives from Invesco Aim Affiliates or the funds, as well as about fees and/or commissions it charges.

EXCESSIVE SHORT-TERM TRADING ACTIVITY (MARKET TIMING) DISCLOSURES

While the funds provide their shareholders with daily liquidity, their investment programs are designed to serve long-term investors and are not designed to accommodate excessive short-term trading activity in violation of our policies described below. Excessive short-term trading activity in the funds' shares (i.e., a purchase of fund shares followed shortly thereafter by a redemption of such shares, or vice versa) may hurt the long-term performance of certain funds by requiring them to maintain an excessive amount of cash or to liquidate portfolio holdings at a disadvantageous time, thus interfering with the efficient management of such funds by causing them to incur increased brokerage and administrative costs. Where excessive short-term trading activity seeks to take advantage of arbitrage opportunities from stale prices for portfolio securities, the value of fund shares held by long-term investors may be diluted. The Board has adopted policies and procedures designed to discourage excessive or short-term trading of fund shares for all funds except the money market funds. However, there is the risk that these funds' policies and procedures will prove ineffective in whole or in part to detect or prevent excessive or short-term trading. These funds may alter their policies at any time without prior notice to shareholders if the advisor believes the change would be in the best interests of long-term shareholders.

The Invesco Aim Affiliates currently use the following tools designed to discourage excessive short-term trading in the retail funds:

- Trade activity monitoring.
- Trading guidelines.
- Redemption fees on trades in certain funds.
- The use of fair value pricing consistent with procedures approved by the Board.

Each of these tools is described in more detail below. Although these tools are designed to discourage excessive short-term trading, you should understand that none of these tools alone nor all of them taken together eliminate the possibility that excessive short-term trading activity in the funds will occur. Moreover, each of these tools involves judgments that are inherently subjective. Invesco Aim Affiliates seek to make these judgments to the best of their abilities in a manner that they believe is consistent with long-term shareholder interests.

Some investments in the funds are made through accounts that are maintained by intermediaries (rather than the funds' transfer agent) and some investments are made indirectly through products that use the funds as underlying investments, such as employee benefit plans, funds of funds, qualified tuition plans, and variable insurance contracts (these products are generally referred to as conduit investment vehicles). If shares of the funds are held in an account maintained by an intermediary or in the name of a conduit investment vehicle (and not in the names of individual investors), the intermediary account or conduit investment vehicle may be considered an individual shareholder of the funds for purposes of assessing redemption fees. In these cases, the funds are likely to be limited in their ability to assess redemption fees on transactions initiated by individual investors, and the applicability of redemption fees will be determined based on the aggregate holdings and redemptions of the intermediary account or the conduit investment vehicle.

If shares of the funds are held in an account maintained by an intermediary or in the name of a conduit investment vehicle (and not in the names of individual investors), the intermediary or conduit investment vehicle may impose rules intended to limit short-term money movements in and out of the funds which differ from those described in this prospectus. In such cases, there may be redemption fees imposed by the intermediary or conduit investment vehicle on different terms (and subject to different exceptions) than those set forth above. Please consult your financial advisor or other intermediary for details.

Money Market Funds. The Board of AIM Money Market Fund, AIM Tax-Exempt Cash Fund, Premier Portfolio, Premier Tax-Exempt Portfolio and Premier U.S. Government Money Portfolio (the money market funds) have not adopted any policies and procedures that would limit frequent purchases and redemptions of such funds' shares. The Board considered the risks of not having a specific policy that limits frequent purchases and redemptions, and determined that those risks were minimal. Nonetheless, to the extent that a money market fund must maintain additional cash and/or

securities with short-term durations in greater amounts than may otherwise be required or borrow to honor redemption requests, the money market fund's yield could be negatively impacted.

The Board does not believe that it is appropriate to adopt any such policies and procedures for the money market funds for the following reasons:

- The money market funds are offered to investors as cash management vehicles; investors must perceive an investment in such funds as an alternative to cash, and must be able to purchase and redeem shares regularly and frequently.
- One of the advantages of a money market fund as compared to other investment options is liquidity. Any policy that diminishes the liquidity of the money market funds will be detrimental to the continuing operations of such funds.
- The money market funds' portfolio securities are valued on the basis of amortized cost, and such funds seek to maintain a constant net asset value. As a result, there are no price arbitrage opportunities.
- Because the money market funds seek to maintain a constant net asset value, investors expect to receive upon redemption the amount they originally invested in such funds. Imposition of redemption fees would run contrary to investor expectations.

AIM Limited Maturity Treasury Fund. The Board of AIM Limited Maturity Treasury Fund has not adopted any policies and procedures that would limit frequent purchases and redemptions of such fund's shares. The Board considered the risks of not having a specific policy that limits frequent purchases and redemptions and determined that those risks were minimal. Nonetheless, to the extent that AIM Limited Maturity Treasury Fund must maintain additional cash and/or securities with short-term durations in greater amounts than may otherwise be required or borrow to honor redemption requests, AIM Limited Maturity Treasury Fund's yield could be negatively impacted.

The Board does not believe that it is appropriate to adopt any such policies and procedures for the fund for the following reasons:

- Many investors use AIM Limited Maturity Treasury Fund as a short-term investment alternative and should be able to purchase and redeem shares regularly and frequently.
- One of the advantages of AIM Limited Maturity Treasury Fund as compared to other investment options is liquidity. Any policy that diminishes the liquidity of AIM Limited Maturity Treasury Fund will be detrimental to the continuing operations of such fund.

Trade Activity Monitoring

Invesco Aim Affiliates monitor selected trades on a daily basis in an effort to detect excessive short-term trading activities. If, as a result of this monitoring, Invesco Aim Affiliates believe that a shareholder has engaged in excessive short-term trading, they will seek to act in a manner that they believe is consistent with the best interests of long-term investors, which may include taking steps such as (i) asking the shareholder to take action to stop such activities or (ii) refusing to process future purchases or exchanges related to such activities in the shareholder's accounts other than exchanges into a money market fund. Invesco Aim Affiliates will use reasonable efforts to apply the fund's policies uniformly given the practical limitations described above.

The ability of Invesco Aim Affiliates to monitor trades that are made through accounts that are maintained by intermediaries (rather than the funds' transfer agent) and through conduit investment vehicles may be severely limited or non-existent.

Trading Guidelines

If you exceed four exchanges out of a fund per calendar year (other than the money market funds and AIM Limited Maturity Treasury Fund), or a fund or an Invesco Aim Affiliate determines, in its sole discretion, that your short-term trading activity is excessive (regardless of whether or not you exceed such guidelines), it may, in its discretion, reject any additional purchase and exchange orders.

The ability of Invesco Aim Affiliates to monitor exchanges made through accounts that are maintained by intermediaries (rather than the funds' transfer agent) and through conduit investment vehicles may be severely limited or non-existent. If shares of the funds are held in the name of a conduit investment vehicle and not in the names of the individual investors who have invested in the funds through the conduit investment vehicle, the conduit investment vehicle may be considered an individual shareholder of the funds. To the extent that a conduit investment vehicle is considered an individual shareholder of the funds, the funds are likely to be limited in their ability to impose exchange limitations on individual transactions initiated by investors who have invested in the funds through the conduit investment vehicle.

Redemption Fees

You may be charged a 2% redemption fee if you redeem, including redeeming by exchange, shares of certain funds within 31 days of purchase. The ability of a fund to assess a redemption fee on redemptions effectuated through accounts that are maintained by intermediaries (rather than the funds' transfer agent) and through conduit investment vehicles may be severely limited or non-existent.

Fair Value Pricing

Securities owned by a fund are to be valued at current market value if market quotations are readily available. All other securities and assets of a fund for which market quotations are not readily available are to be valued at fair value determined in good faith using procedures approved by the Board. Fair value pricing may reduce the ability of frequent traders to take advantage of arbitrage opportunities resulting from potentially "stale" prices of portfolio holdings. However, it cannot eliminate the possibility of frequent trading.

Obtaining Additional Information

More information may be obtained free of charge upon request. The Statement of Additional Information (SAI), a current version of which is on file with the Securities and Exchange Commission (SEC), contains more details about the fund and is incorporated by reference into the prospectus (is legally a part of the prospectus). Annual and semiannual reports to shareholders contain additional information about the fund's investments. The fund's annual report also discusses the market conditions and investment strategies that significantly affected the fund's performance during its last fiscal year. The fund also files its complete schedule of portfolio holdings with the SEC for the 1st and 3rd quarters of each fiscal year on Form N-Q. The fund's most recent portfolio holdings, as filed on Form N-Q, are also available at <http://www.invescoaim.com>.

If you have questions about this fund, another fund in The AIM Family of Funds® or your account, or wish to obtain free copies of the fund's current SAI or annual or semiannual reports, please contact us by mail at Invesco Aim Investment Services, Inc., P.O. Box 4739, Houston, TX 77210-4739 or

By Telephone: (800) 959-4246

On the Internet: You can send us a request by e-mail or download prospectuses, SAIs, annual or semiannual reports via our website: <http://www.invescoaim.com>

You can also review and obtain copies of the fund's SAI, financial reports, the fund's Forms N-Q and other information at the SEC's Public Reference Room in Washington, DC; on the EDGAR database on the SEC's Internet website (<http://www.sec.gov>); or, after paying a duplicating fee, by sending a letter to the SEC's Public Reference Section, Washington, DC 20549-0102 or by sending an electronic mail request to publicinfo@sec.gov. Please call the SEC at 1-202-942-8090 for information about the Public Reference Room.

AIM Income Allocation Fund SEC 1940 Act file number: 811-02699
