

# AIM Structured Core Fund

## Large-cap blend

Data as of Sept. 30, 2009

### Investment objective and strategy

The fund seeks to provide long-term growth of capital by investing, normally, at least 80% of its assets in a diversified portfolio of securities of large-cap companies.

### Portfolio management

Jeremy Lefkowitz, Maureen Donnellan, William E. Merson, Daniel Tsai, W. Lawson McWhorter, Anne M. Unflat

### How does the fund fit into your portfolio?

- **Designed for a specific risk/return profile.** The strategy targets a 2.3% excess return and a 4% tracking error versus the S&P 500 Index.
- **Style purity for large core.** The fund may improve the style integrity of an investor's overall allocation model. The team seeks to provide characteristics that are similar to the S&P 500 Index by following various product specifications, such as holdings sizes and sector weightings.
- **Risk management.** The team seeks to minimize relative risk exposures associated with industries, style (size, growth/value) and beta.

### Fund Facts

|----------------------------------|---|
| Nasdaq                           | A: SCAUX B: SBCUX C: SCCUX<br>Investor: SCNUX<br>Y: SCAYX R: SCRUX I: SCIUX |
| Total Net Assets                 | \$113,713,400   |
| Total Number of Holdings         | 80  |
| Annual Turnover (as of 08/31/08) | 118%  |

### Investment Map(s)

The map illustrates areas in which the fund typically invests, not necessarily within a limited period of time.

### Top Equity Holdings

|                              | % of Total Net Assets |
|------------------------------|-----------------------|
| Exxon Mobil Corp.            | 5.29                  |
| Microsoft Corp.              | 4.00                  |
| Apple Inc.                   | 3.64                  |
| IBM Corp.                    | 3.49                  |
| AT&T Inc.                    | 3.22                  |
| Wal-Mart Stores Inc.         | 2.66                  |
| The Goldman Sachs Group Inc. | 2.61                  |
| Occidental Petroleum Corp.   | 2.59                  |
| Chevron Corp.                | 2.53                  |
| Amgen Inc.                   | 2.27                  |

Holdings are subject to change and are not buy/sell recommendations.

### Top Industries

|                                       |       |
|---------------------------------------|-------|
| Integrated Oil & Gas                  | 11.06 |
| Pharmaceuticals                       | 8.05  |
| Computer Hardware                     | 7.14  |
| Integrated Telecommunication Services | 5.76  |
| Systems Software                      | 5.75  |
| Property & Casualty Insurance         | 5.02  |
| Biotechnology                         | 3.72  |
| Homebuilding                          | 3.36  |
| Computer Storage & Peripherals        | 3.20  |
| Apparel Retail                        | 2.86  |

Holdings are subject to change and are not buy/sell recommendations.

### Expense Ratios

|                       | % Net | % Total |
|-----------------------|-------|---------|
| Class A Shares        | 1.01  | 1.20    |
| Class C Shares        | 1.76  | 1.95    |
| Investor Class Shares | 1.01  | 1.20    |
| Class Y Shares        | 0.76  | 0.95    |

Per the current prospectus

Net = Total annual operating expenses less any contractual fee waivers and/or expense reimbursements by the adviser in effect through at least June 30, 2010. See current prospectus for more information.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invescoaim.com](http://invescoaim.com) for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or a loss when you sell shares. No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C shares following one year from the date shares were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Investor Class shares have no sales charge; therefore, performance is at NAV. Returns since the Investor Class shares' inception date are historical returns. All other returns are blended returns of historical Investor Class share performance and restated Class A share performance (for periods prior to the inception date of Investor Class shares) at NAV and reflect the Rule 12b-1 fees applicable to Class A shares. Class Y shares have no sales charge; therefore, performance is at NAV. Returns since the Class Y shares' inception date are actual returns. All other returns are blended returns of actual Class Y share performance and restated Class A share performance (for periods prior to the inception date of Class Y shares) at NAV and reflect the Rule 12b-1 fees as well as any fee waivers or expense reimbursements applicable to Class A shares. Had fees not been waived and/or expenses reimbursed currently or in the past, returns would have been lower. Returns less than one year are cumulative; all other performance figures are annualized.

### Calendar-Year Total Returns (%)

Inception year is 2006.

### About risk

Portfolio turnover is greater than most funds, which may affect the fund's performance due to higher brokerage commissions. Active trading may also increase short-term gains and losses, which may result in taxable gain distributions to the fund's shareholders.

Credit risk is the risk of loss on an investment due to the deterioration of an issuer's financial health. Such a deterioration of financial health may result in a reduction of the credit rating of the issuer's securities and may lead to the issuer's inability to honor its contractual obligations, including making timely payment of interest and principal.

The fund may use enhanced investment techniques such as derivatives. The principal risk of derivatives is that the fluctuations in their values may not correlate perfectly with the overall securities markets. Derivatives are subject to counterparty risk - the risk that the other party will not complete the transaction with the fund.

Prices of equity securities change in response to many factors, including the historical and prospective earnings

## About risk (continued)

of the issuer, the value of its assets, general economic conditions, interest rates, investor perceptions and market liquidity.

Foreign securities have additional risks, including exchange rate changes, political and economic upheaval, relative lack of information, relatively low market liquidity, and the potential lack of strict financial and accounting controls and standards.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

Leveraging entails risks such as magnifying changes in the value of the portfolio's securities.

There is no guarantee that the investment techniques and risk analysis used by the fund's portfolio managers will produce the desired results.

The prices of securities held by the fund may decline in response to market risks.

Because a large percentage of the fund's assets may be invested in securities of a limited number of companies, each investment has a greater effect on the fund's overall performance and any change in the value of those securities could significantly affect the value of an investment in the fund.

Investor Class shares are closed to new investors. Investors should contact their financial advisor about other share classes.

Class Y shares are available only to certain investors. See the prospectus for more information.

The fund holdings are organized according to the Global Industry Classification Standard, which was developed by and is the exclusive property and service mark of MSCI Inc. and Standard & Poor's.

The S&P 500® Index is an unmanaged index considered representative of the U.S. stock market. An investment cannot be made directly in an index.

**12-month forward and trailing P/E** are calculated using weighted harmonic averaging, which helps avoid extreme results that may occur due to small relative numbers in the denominator. It doesn't exclude extreme values; instead, it reduces the effect of outliers on the aggregate calculation. The **price/book ratio** is the market price of a stock divided by the book value per share.

**Return on equity (ROE)** is net income divided by net worth. The **three-year EPS growth rate** is a weighted average of each stock holding's growth rate in earnings per share (EPS). EPS is total earnings divided by the number of shares outstanding. The **five-year dividend growth rate** is the weighted average of each stock holding's annualized percentage rate of growth in dividend yield over five years. **Alpha** (cash adjusted) is a measure of performance on a risk-adjusted basis. **Beta** (cash adjusted) is a measure of relative risk and the slope of regression. **R-squared** (cash adjusted) expresses the proportion of variation in the return of one fund explained by the return of a benchmark. **Tracking error** measures the difference between returns of a portfolio and its benchmark index. The **up and down capture** measures how well a manager was able to replicate or improve on periods of positive benchmark returns and how severely the manager was affected by periods of negative benchmark returns. **Standard deviation** measures a fund's range of total returns and identifies the spread of a fund's short-term fluctuations.

It may not be copied or distributed and is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Ratings are based on a risk-adjusted return measure that accounts for variation in a fund's monthly performance, placing more emphasis on the downward variations and rewarding consistent performance. With-load ratings include the effect of sales charges, loads and redemption fees. Load-waived ratings exclude sales charges, loads and redemption fees, and are only applicable to investors not subject to sales charges. Had fees not been waived and/or expenses reimbursed currently or in the past, the Morningstar rating would have been lower. The overall rating is derived from a weighted average of three-, five- and 10-year rating metrics, as applicable. Ratings are as of the most recent quarter end and are subject to change every month. A fund is eligible for a Morningstar rating three years after inception. The top 10% of funds in a category receive five stars, the next 22.5% four stars, the next 35% three stars, the next 22.5% two stars and the bottom 10% one star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) Ratings for other share classes may differ due to different performance characteristics. Past performance does not guarantee future results.
